

RPMM - Mobile Matrix Mounts

The RPMM Mobile Matrix (Deployable Matrix Video Wall) for flat panels or LED is the industry's first portable, deployable mounting solution, making it perfect for Rentals, Tradeshows, and Portable Video Wall applications. Also, semi-permanent installations allow flexibility for future changes.

The RPMM Mobile Matrix comes pre-assembled, ready for either four flat panel Displays, or LED, and ships in its own durable road case. The Mobile Matrix's design is ideal for quick set-up and tear-down. Once set up, the bottom of the panel has a minimum height of 29" from the floor, with a

maximum height of 42" when fully deployed. Once in the fully raised position, the dual panel doors can be swung open to either a flat 180 degree orientation, or positioned anywhere in between, enabling the system to be powered up for use. To expand the wall horizontally, simply add as many Mobile Matrix units as desired.

Features

- 2 wide x 2 high Panel Array (panels not included)
- LED panels can also be used
- Can expand horizontally beyond 2 wide
- Aluminum Frame Construction
- Easy to Install and Service
- Push Button Motorized Lift
- Padded Road Case
- Lockable Casters
- Single Person Set Up & Strike
- Landscape display
- Max Height of 60.5" for 46" panel and 68.5" for 55" panel

RPMM - Mobile Matrix Mounts

When moving or loading the Mobile Matrix Travel Case, please be aware that the installed flat panels /LED Panels are fragile. Take extra care to insure that the case never comes in contact with wall, door jamb, truck wall, or other horizontal surface. When rolling across floors or ramps, please be aware of any changes in floor height. The best practice is to stop forward motion of the case, then carefully lift over any obstacles using the case handles.

Shipping RPMM Mobile Matrix

The primary function of the Mobile Matrix Travel Case is to facilitate quick deployment of the flat panels/LED panels. The case does not provide complete panel protection, therefore, proper care and handling of the cases during transport is crucial. Please ship the RPPM-DMVW on a sanitized, climate controlled, air ride trailer with a lift gate to insure its protection during loading and shipment.

Tips for Using RPMM Mobile Matrix

- Be aware that the junction between the flat panel/LED displays is a PINCH point. Please have all hands, arms, and other body parts clear of this junction prior to folding the mount to the open position.
- This unit includes electrical motors to elevate and position the flat panel mounting system. Please use caution around the device when the motors are in motion.
- This unit is subject to tipping if moved in the open position. Please secure the rear of the enclosure prior to any relocation with the mounting system in the operating position.
- Please use caution when moving the enclosure with panels installed as panels may incur damage in harsh movements.
- Please refer to Operator's Manual for complete instructions. rp Visual Solutions is not responsible for any damage to flat panels.
