

RPPM - inVizible

The inVizible Swing Out Wall Mount offers an elegant “built-in” solution for mounting flat panel displays in the wall. This is a complete system that is easy to install, operate, and service. It offers an extremely narrow profile, and therefore protrudes less into the room.

The system’s hinged “fold-out” mounting arm allows easy access to the rear and side of the flat panel display for service and cable connections. The uniquely designed “ductless” cooling system draws cool air from the bezel’s bottom edge—circulating air throughout the enclosure while pushing the warm air out at the bezel’s top edge.

This innovative visual display allows any size panel to be installed in the wall, and enables other products to be stowed, hidden, or stored within the bezel. The back box can go in during the construction phase and electronics can be added later. It does not void the warranty as there is a ductless fan system. The resulting image looks like a picture hung on the wall.

Features

- In-Wall Sheet Metal Enclosure
- Active “Ductless” Cooling System
- Hinged Fold-out Mounting Arm
- Mounting Arm Extends 55 degrees
- Compatible with ALL flat panel displays
- Clip on Bezel: White, Black, Unfinished, or Custom
- Cooling Fan included
- J-Box and Conduit knockouts
- Available in Landscape or Portrait orientation

Applications

- Retail
- Kiosks
- Lobbies
- Airports
- Point of Sale
- Digital Signage
- Training Facilities
- Conference Rooms
