Randy Pagnan
President
randy@rpvisuals.com

Randy Pagnan, President of rp Visual Solutions, has been immersed in the visual display industry for over three decades, specializing in 24/7 displays for large-venue display applications. Network Operation Centers, Digital Signage environments, and immersive 3D applications are a few of his specialties—but his knowledge base is always evolving. Randy has also established himself as one of the premier educators in control room design and projection screen technology.

After earning a CMA diploma in accounting, Randy began his AV career in an accounting position at Electrohome (now Christie), where he quickly developed an interest in visual displays. From accounting he moved into sales, eventually becoming Vice-President of Sales worldwide—specializing in Command Control Communications and Display Environments. After being promoted to VP of Sales for two other AV Dealers, Randy expanded into manufacturing, integration, and the unique display needs of live events. In 2005, he formed rp Visual Solutions to serve the AV Dealer, Integrator, & Consultant in developing innovative visual displays & mounting solutions for demanding visual environments.

In addition to owning and operating AV companies, Randy has been volunteering for the last 25 years as well. He's currently a DSF (Digital Signage Foundation) Committee Chair member and an Adjunct Faculty Instructor for the InfoComm Academy. He first joined the InfoComm International Board of Governors in 2001, became President in 2006, Chairman in 2007, and previously resided on the InfoComm Asia board. He has worked with the InfoComm Design School as well as chaired the InfoComm Manufacturer's Council. Additionally, Pagnan holds CTS (Certified Technology Specialist) and ISF-C (Imaging Science Foundation-Commercial) credentials and expounds training in his own company—developing the NitWit Training Series in 2006, providing ongoing education to AV integrators, consultants, and end users. NitWit is composed of the words Nit (light measurement) and Wit (quick knowledge).

Randy brings his myriad of knowledge to the Audio Visual Industry as a manufacturer, system integrator, and display expert. He offers a vast array of experience
