geoAMPS attending SEE Conference and Trade Show

Posted by Dan Liggett on June 19, 2013 at 12:50pm

[View Blog](#)

geoAMPS is attending the Southeastern Electric Exchange (SEE) annual Conference and Trade Show June 26-28 in Orlando, Fla. Guy Allen, Business Development Executive, will be there to meet with industry representatives and discuss how geoAMPS products and services can meet their project and overall organizational needs.

The annual trade show is a popular event for representatives of utilities and manufacturers, and for contractors, consultants, specialists and other industry professionals. Sessions provide in-depth presentations by experts on the latest issues and applications; highlight perspectives on global issues and their impact on individual businesses; and offer feedback and solutions for current technical challenges. Attendees will also have the opportunity to view the latest equipment and technology being used or available to participating industries.

Topics that will be addressed include finance and accounting, electric distribution, environmental/production, real estate and right of way, substations, transmission lines, supply chain management and transportation.

geoAMPS is a growing technology company in the Columbus, OH, area that specializes in software solutions to manage land rights and infrastructure assets. geoAMPS is pushing industries forward through innovative technology that increases communication, improves organizational processes and advances quicker project completions. By using geoAMPS product software, organizations can realize up to 35 percent savings in project costs.

geoAMPS has developed a line of software products that address the specific industry needs. Each product is a secure, Web-based system that offers mobile application for employees in the field. There also is a detached capability when the Internet

connection is unreliable or unavailable. geoAMPS provides geographical information system (GIS) mapping, delivering an integrated geospatial view of an organization's project area.

geoAMPS products include rowAMPS, which provides a central repository to manage all land rights and infrastructure assets information for one or multiple projects. rowAMPS allows organizations to manage right-of-way projects and land assets in a real-time, paperless environment that enables collaboration, efficiency and error reduction. rowAMPS provides detailed coverage of all right-of-way processes, such as route planning, budgeting, due diligence, negotiation with property owners, title, survey, acquisition, environmental, payments and legal.

Managing mineral rights while keeping crews up-to-date is complex, but critical for Exploration and Production companies (E&P). landAMPS, another geoAMPS product, meets the needs of fast-paced lease acquisitions and manages costly drilling schedules where accuracy and speed are equally critical to overall success. With landAMPS, E&P organizations can streamline workflows and eliminate costly errors in mineral exploration, drilling, mining and production operations.

altAMPS is another in the product line developed by geoAMPS. This powerful, intuitive software was tailor-made for wind, solar, geothermal, biomass and other alternative energy projects through each phase of development, construction and ongoing operation. altAMPS can save project costs and promote efficiency in a paperless environment. altAMPS offers time-saving tools, such as lease management, meteorological tower management, royalty payment calculator, bulk update, automatic reminders, payment tracker and scheduler, workflow and import-export capabilities.

For transportation agencies and organizations, geoAMPS offers dotAMPS, a single solution for end-to-end management of road transportation projects, and rxrAMPS, designed to track railroad assets and manage rail projects.

SEE attendees will also be interested in learning about ecoAMPS, a geoAMPS product for organizations that restore natural habitats, including locations where mining operations have taken place and concluded. By utilizing ecoAMPS, organizations gain management of all aspects of land reclamation projects, including project identification, scoping, environmental assessment, bidding and project tracking.

For more information on geoAMPS' complete line of products, visit with Guy Allen at the SEE conference, go to www.geoamps.com or call 614-389-4871.
