

Model R

The Model R is the perfect Walker Mower for residential properties. The belt-driven mower blades make operation smooth and quiet without compromising on the Walker Mower's distinct advantages. The Model R provides the premium Walker experience so you can bring home fast, easy, beautiful mowing.

R21

- 21 HP Kohler KT620 with Smart-Choke™ technology for easy starts in hot and cold weather
- Hydro-Gear EZT transmissions
- Ogura electric blade clutch and brake with easy pull/push switch operation
- Tilt-up deck and tilt-open seat
- 3.0 gallon custom molded, low profile fuel tank with integrated fuel level gauge
- Flexible deck carrier frame
- Precision steering lever control system
- Forward Speed Control

Model R Popular Add-ons

- Comfort Seat
- Tow Hitch
- Mulching Kit including bolt-in baffles and serrated mulching blades
- Accelerator™ side-mount grass catcher
- LED Light Kit

With S42 deck

- 42 inch cutting width
- Belt-driven blades with dampened belt tensioner for smooth, quiet operation
- Custom blade spindles with grease zerk and bleed valve

With S48 deck

- 48 inch cutting width
- Belt-driven blades with dampened belt tensioner for smooth, quiet operation
- Custom blade spindles with grease zerk and bleed valve

P/N: 6895-90

Bring Home the **Model R**

Home is more than just where you hang your hat. Home is where you gather, and share with family and friends. Home is where you pause to give thanks, and take time to remember your blessings. Home is a beautiful place. The Walker Model R can help keep the place you call home beautiful. The Model R has been specifically designed to meet the high standards of residential owners. Ease of use, quality cut, operator comfort, reliability, and easy maintenance are essential — and the Model R delivers on every count.

Integrated Front-Mount Deck Design

The Model R features an integrated, front-mount deck design available in 42 and 48 inch cutting widths. The deck mounts on independent articulating deck arms, allowing it to freely move up and down, minimizing scalping and uncut areas of grass. The torsion-flex carrier frame also allows the deck to flex side-to-side, so no matter the terrain, the Model R delivers a beautiful cut.

Optional Mulching Kit

The Model R can be fitted with an optional mulching kit that includes bolt-on baffles and serrated mulching blades.

Optional Grass Catcher

The Accelerator™ side-mount grass catcher can be used with the Model R for collection of yard debris, leaves, and grass clippings.

Tilt-Open Seat and Tilt-Up Deck

The Model R's tilt-open seat quickly exposes the drive belts, electric system, and drivetrain making service and maintenance easy. No special tools are needed. Simply release the seat panel latch and the gas spring assisted seat pan opens up for access to all of the working components.

All Walker decks quickly tilt-up, making maintenance tasks safe and easy. It takes seconds to unlock, lift, and secure the deck in the up position, providing access to the blades and housing. The mower deck drive belt connection is automatically maintained as the deck is raised and lowered.

Precision Steering and Handling

The Walker steering system uses a Forward Speed Control, controlled with the operator's right hand, to engage and set the maximum forward speed of the machine. Once in the drive position, the Forward Speed Control uses a friction lock to work as a cruise control, allowing the operator to control the mower by simply applying pulling pressure on the steering levers. To stop, pull the Forward Speed Control back to the Neutral-Park position.

Walker Mower steering levers, controlled with the operator's left hand, give precise control the moment pressure is applied. Each steering lever is spring-dampened, providing smooth machine operation. The operator easily steers the machine by controlling both levers with a single hand using only gentle fingertip pressure. The steering system is designed for precision steering and handling using optimal linkage geometry and high-quality components.

Fast On-The-Job Mowing

Zero-turn maneuverability is standard on every Walker Mower through dual, independent hydrostatic transmissions. This allows each drive tire to operate independently in any range of motion. Paired with its compact size, low center of gravity, and operator position directly on the center of the rotation axis, the Walker Mower is one of the most agile mowers on the market.

Tight trimming is fast, accurate, and easy, allowing the operator to maintain constant forward motion, increasing productivity and quality of mowing.
