

The Walker Advantage
PRODUCTIVITY

Compact

thewalkeradvantage.com/compact

The Walker Mower has a small footprint designed to get into and out of tight places.

Clearance

Mow Completely

Most lawns have areas with low hanging branches, narrow gates, or other obstacles that are difficult to mow. The compact size of the Walker Mower gives you the ability to mow challenging properties easily and efficiently.

Integrated Components

Powerful from the Inside Out

Walker created the concept of a completely internal Grass Handling System that delivers cut grass and debris from the deck to the catcher box without bulky external components.

Steering

thewalkeradvantage.com/steering

The Walker Mower precisely goes where you want it to with little effort, thanks to the operator-friendly combination of finger-tip steering and the Forward Speed Control.

Forward Speed Control

The patented Forward Speed Control takes the effort out of handling a zero-turn mower by setting forward ground speed and acting as a cruise control.

Steering Levers

The Walker Mower steering levers have a light and responsive feel. Precise fingertip control makes close trimming and detail mowing easy, requiring less effort compared to lap bars.

Less Turning Resistance

The maneuverability of the Walker is enhanced by using counterweight springs to reduce weight on the deck caster wheels and tail wheel. Lightly loaded caster wheels allow the drive system to immediately steer, making the Walker responsive and efficient.

Balance

thewalkeradvantage.com/balance

The balanced weight distribution, low center of gravity, and low overall vehicle weight allow the Walker Mower to move efficiently on flat ground and slopes.

Consistent Traction No Matter the Location

Predictable traction is fundamental to confident operation. Traction is increased when the weight of the mower is concentrated where the drive tires meet the turf. Whether you are mowing on hillsides or making high-speed zero turns, the Walker Mower will provide the traction that allows you to mow with confidence.

Low Center of Gravity

Counterweight Springs OFF

Counterweight Springs ON

Better Traction Through Engineering

The counterweight springs enhance the traction of the Walker by transferring weight from the deck caster wheels and the tail wheel onto the drive tires.

Agile

thewalkeradvantage.com/agile

The Walker Mower's compact size, balance, and precision steering and handling produce the agility required to complete tasks quickly.

1. Bed Contours
Navigate contours with speed and precision.

2. Gates
Pass through yard gates without wasting time changing out equipment.

3. Berms
Even the smallest slopes or pitches require good traction to navigate quickly.

4. Fence Lines
Predictable steering gives you confidence to quickly maneuver.

5. Tight Corners
Tight corners and low hanging obstacles do not slow down the compact Walker Mower.

Trimming

thewalkeradvantage.com/trimming

Trimming with the Walker Mower's front-mounted deck is fast, easy, and accurate.

Trim on the Left ...and the Right

All Walker collection, mulching, and rear discharge decks allow you to trim on both sides. Stay productive in more areas by mowing, not planning out your pattern.

Continuous Forward Motion

More deck overhang outside of the drive tires reduces the effort and time it takes to trim around trees, beds, and other landscape features. The Walker easily and precisely trims more beds and raised obstacles in one pass, saving you time.

Reach

thewalkeradvantage.com/reach

The low profile, front-mount deck on the Walker Mower allows operators to trim under low hanging landscape features and split rail fencing.

Front Reach

Mow Under, Not Around

Your trees will love the Walker Mower's low profile deck. Trimming around and under low hanging branches with a Walker Mower is easy and safe with minimal impact on your landscape.

The Stats

Clearance is the height of the front caster fork and represents what the front of the deck can fit underneath.

Reach measures how far the deck can mow underneath an object.

Clearance: 12½ in
Reach: 20 in

Side Reach

A distinct productivity advantage for the Walker Mower is the ability of the front-mount deck to reach to the side and do the job where string trimmers are usually required.

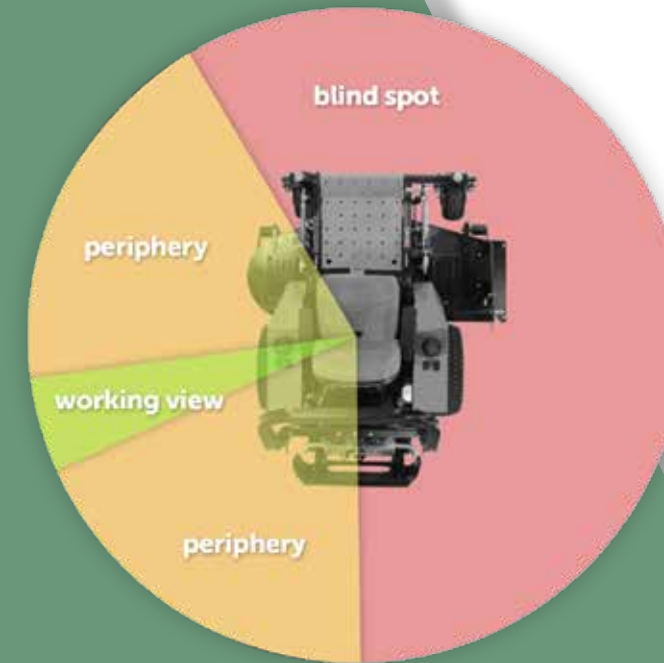

View

thewalkeradvantage.com/view

The Walker operator has a complete view of the mower deck and the grass surrounding it. This unrestricted view leads to comfortable, safe operation, and a beautiful cut.

Designed by Farmers to Make Straight Rows

Better View By Design

Since the original design, operator view has been an engineering priority for the Walker Mower.

Eyes Front and Center

The front-mount deck of the Walker Mower allows you to keep your eyes front and center while operating your mower. Being able to see both the deck overlap area and the end of a row helps produce straight stripes.

Walker Mower Tire View

You can see the area over either tire on a Walker Mower while maintaining a forward facing position. This means the area in front of the mower is still in your peripheral vision keeping you and your surroundings safe.

Comparative Tire View

On many mid-mount style machines you have to turn your body and head to extreme angles to see the deck or tire edges. This effectively shrinks the forward view, creating dangerous blind spots in your mowing path.

4 Properties, 18 Mowers, 36 Weeks. The results are in.

Rigden Farms Community Center

0.48 Acres, 20,909 sq. feet,
 Kentucky Blue Grass

The Rigden Farms Community Center is the perfect application of commercial mowing where quality of cut paired with grass collection is critical. The property has multiple fences, narrow gates, landscaped trees, and that narrow swath of grass between the sidewalk and street we all love so much.

Mower	Power	Deck	Time	+	%	Area Per Hour
Walker T25i	25 hp	52"	38:22	-	-	0.75 ac/H
Wright Stander X	24 hp	52"	42:09	+3:47	+10%	0.68 ac/H
Toro Z8000	23 hp	48"	43:49	+5:27	+14%	0.66 ac/H
Kubota ZG227	27 hp	54"	44:38	+6:16	+16%	0.65 ac/H
Scag Cheetah	25 hp	52"	45:17	+6:55	+18%	0.64 ac/H
Grasshopper 727t	27 hp	52"	55:29	+17:07	+45%	0.52 ac/H

Platte River Power Authority

1.14 Acres, 49,658 sq. feet,
 Kentucky Blue Grass

Platte River offers a few challenges for the commercial operator. While it does have lots of wide-open mowing, it has a 20° berm with trees at its crest along with tightly clustered landscape rocks. In addition to open productivity capability, a well matched mower for this property needs excellent trimming capabilities and a true floating deck design.

Mower	Power	Deck	Time	+	%	Area Per Hour
Walker B23i	23 hp	48"	35:54	-	-	1.91 ac/H
Toro Grandstand	20 hp	48"	38:39	+2:45	+8%	1.77 ac/H
Gravely Pro Turn 148	24 hp	48"	39:06	+3:12	+9%	1.75 ac/H
Exmark Pioneer S	22 hp	48"	41:45	+5:51	+16%	1.64 ac/H
Wright Stander I	19 hp	48"	43:40	+7:46	+22%	1.57 ac/H
Stiga Park Pro	24 hp	48"	42:11	+6:17	+17%	1.62 ac/H

4 Properties, 18 Mowers, 36 Weeks. The results are in.

Timberline Church

2.77 Acres, 120,661 sq. feet,
 Kentucky Blue Grass

Timberline Church is the ideal property for wide open, high speed, discharge or mulching mowing. It features a large open lawn with a culvert running its length, two lamp posts, and perimeter trees to be trimmed. For a mower to excel here, it needs to operate at high speed while maintaining maneuverability and providing a beautiful cut.

Mower	Power	Deck	Time	+	%	Area Per Hour
Walker H27i	27 hp	60"	33:32	-	-	4.96 ac/H
Exmark Lazer Z	27 hp	60"	33:54	+0:22	+1%	4.90 ac/H
John Deere Z930M	27 hp	60"	34:07	+0:35	+2%	4.87 ac/H
Dixie Chopper Silver Eagle	27 hp	60"	36:13	+2:41	+8%	4.59 ac/H
Hustler SuperZ	27 hp	60"	36:37	+3:05	+9%	4.54 ac/H
Ferris IS2100z	29 hp	61"	39:22	+5:50	+17%	4.22 ac/H
Scag Turf Tiger	29 hp	61"	40:47	+7:15	+21%	4.08 ac/H

Moonglow Drive

0.07 Acres, 3,049 sq. feet,
 Kentucky Blue Grass

Moonglow Drive is the typical residential lawn with lots of tight spaces, a 42" back yard gate opening, and landscaped beds. For most other brands, a commercial riding mower is not an option here, but with the compact Walker Mower, getting on and off this lawn in a matter of minutes is a breeze.

Mower	Power	Deck	Time	+	%	Area Per Hour
Walker S14	14 hp	36"	05:48	-	-	0.72 ac/H
Wright Stander I	16 hp	36"	07:05	+1:17	+22%	0.59 ac/H
Toro Turfmaster	7 hp	30"	09:47	+3:59	+69%	0.43 ac/H
Exmark Turf Tracer	15 hp	36"	09:49	+4:01	+69%	0.43 ac/H
Walker S14	14 hp	42"	04:27	-	-	0.94 ac/H
Husqvarna TC342	24 hp	42"	07:50	+3:23	+76%	0.54 ac/H
Kubota Kommander	22 hp	42"	07:55	+3:28	+78%	0.53 ac/H

The Walker Advantage

The Productivity Advantage is comprised of seven reasons that add up to make the Walker Mower one of the most productive mowers on the market: Compact, Steering, Balance, Agile, Trimming, Reach, and View. Walker Mowers are completely original by design and are “Different for the Right Reasons.”
