

Nutech Bickley gets awarded with a tunnel kiln plant for glazed refractories.

On the month of October, Nutech Bickley got awarded with an order to supply a second kiln for glazed refractories.

The 50mt kiln is designed to operate at 1,340°C and has a throughput of 23,800kg per day.

The kiln incorporates the latest heat recovery technology designed to use of every BTU of heat possible from the fuel.

The kiln will also incorporate an advanced control system and a Wonderware SCADA (Supervisory Control and Data Acquisition) which will permit the kiln operators to operate the kiln very efficiently.
