

SPARE PARTS, SERVICE AND RETROFITS

If advances in firing technology, kiln linings materials, and instrumentation have made your kiln obsolete, Nutec Bickley can update kilns to provide “as new or better” performance for a modest capital investment.

Nutec Bickley's Service and Parts Group offers quick response times and outstanding technical service to all kiln owners. You are assured of always getting the correct components on time, every time. Nutec Bickley can also provide regularly scheduled surveys and maintenance visits that will keep your kiln at the peak of operating efficiency.

Nutec Bickley offers a full range of kiln retrofit services including construction systems design and installation, full construction and commissioning services, and upgrades of instrumentation.

CONTROL AND DATA ACQUISITION SYSTEMS

Nutec Bickley's broad control systems design experience, ensures your kiln will have the necessary tools to maintain your process under control.

Our control systems include controllers, hybrid systems, PLC's, operator interfaces, industrial panel PC's, desktop computers, customized supervisory control and data acquisition software (SCADA), and more. In addition to full process control, our systems allow for faster service and troubleshooting by providing remote monitoring capabilities.
