Onvation* Technology:
A Smart Restroom Management System

Facilities today are smarter than ever. Through sensors, software and network connectivity, you can manage your lighting, security, HVAC systems and more. But what about the restroom? Wouldn't it be nice if your restroom could be as smart as the rest of your building?

Now it can be, thanks to Onvation* Technology. This patent-protected restroom management system alerts you to potential problems before they become complaints.

## Simple and easy to use.

It delivers real-time data and alerts on:

- Low product
- Dispenser consumption rates
- Dispenser status
- Restroom traffic
- Trash alerts

Onvation* Technology provides actionable analytics and insights that can help you better manage your business by gaining control of the restroom. It can help you cut costs, reduce waste, boost sustainability, optimize resources and enhance satisfaction.

ONVATION
by KIMBERLY-CLARK PROFESSIONAL*

The Onvation* System is a patented Restroom Management System from Kimberly-Clark Professional* that provides actionable, relevant analytics and insights that allow you to take control of your business by taking control of the restroom.
