Legionella Control Training.

A renowned programme of compliance courses, devised and managed by WCS Group. The H₂O experts.

Welcome to essential refresher and advanced training courses for ACoP L8 compliance

Health and Safety training is a necessary part of risk management, safety and compliance, but it can be made to be practical, responsive, educational, and it can give you and colleagues insights, tools and tips that can be instantly used for 'quick wins' back on site.

The WCS Group is a water treatment and control specialist who offer the IOSH-approved Legionella course programme that our company helped devise and manages on behalf of IOSH (the world's largest professional H&S organisation).

HSE guidelines (updated 2016) now require organisations to keep appropriate colleagues regularly refreshed with Legionella Control (awareness, risk management and best practice) and newly promoted maintenance, engineering, operations, production controllers, site managers, quality control, H&S and environmental and FMs – are all required to undertake refresher or advanced training.

Mick Dempsey
Head of Technical

Be in great company

Here is a selection of some of the organisations who have sent thousands of people on our training courses or have asked for dedicated training on their own site(s) tailored to their plant and equipment needs.

Course options

Public courses are held in a classroom style format (up to 12 typically) with training packs and / or iPads. The learning sessions have been designed pragmatically to break up the course and are visually effective to engage each delegate.

On-site courses are tailored to your site / sector / specific needs. In the last 12-months, we have conducted on-site training at over 300 locations from Aberdeen to Plymouth and Belfast to Ipswich. We travel to you.

Alternatively, e-Learning is available enabling delegates to learn 24/7 at their own pace.

Public courses

(inc refreshments, course materials, certificate but excludes VAT)

- £550 pp Emergency First Aid
- £495 pp for IOSH Managing Safely
- £300 pp for IOSH Legionella Approved
- £230 pp for Legionella for Managers
- £230 pp 'Legionella For Everyone'
- £230 pp Legionella Combined
- £230 pp Legionella Cooling Tower Training
- £195 pp IOSH Managing Refresher
- £195 pp IOSH Working Safely
- £195 pp IOSH Managing Safely Refresher
- £150 pp Confined Space
- £125 pp Legionella Awareness

(for up to 12 delegates)

Quotes from delegates

"Very informative – I now feel more confident with the procedures"

"Good refresher and reminder of responsibility"

"Excellent Legionella workbook exercise and take home information"

"Was impressed by the facts and excellent presentation"

"Great mix of context and bacterial control – correct level for audience – well done"

"The best and most informative course I've attended"

"Excellent course presentation which was delivered with professionalism and expert knowledge to get the messages across"

"Real eye opener"

"Made what can be dull very interesting and thought provoking"

"10 out of 10 and yes, I'd recommend the course to colleagues"

Courses

Emergency First Aid

1-day course. £550 + VAT per group.
This course is designed to offer the essential basic skills, knowledge and confidence required to administer First Aid in a lower risk environment.

IOSH Managing Safely

4-day course. £495 pp.
Animated graphics cover understanding your responsibilities, investigating accidents and incidents, measuring performance. For Managers and Supervisors with H&S / environmental responsibility.

IOSH Managing Refresher

1-day course. £195 pp. Attendees have to have a valid IOSH Managing Safely training certificate less than 3 years old to sit this Refresher course covering your responsibilities, investigating accidents and incidents.

IOSH Legionella Approved

1-day course. £300 pp.
Covers understanding of the risk of Legionella and key control measures, the ACoP, the importance of risk assessment and maintaining comprehensive, up to date records. For those managing Legionella / water hygiene within commercial / domestic systems.

Legionella For Managers

1-day course. £230 pp.
More in-depth management course covering sophisticated Legionella control and compliance with ACoP L8. For Water Cooling Tower and Water Treatment Managers who have passed the entry Legionella course.

Legionella For Everyone

1-day course. £230 pp.
Ensures core or mandatory refresher understanding of what Legionella is, risk management and basic control measures. For anyone from Maintenance to Head of Plant where water treatment and Legionella risk exists.

Legionella Combined

1-day condensed course. £230 pp.
Merging Legionella For Everyone and Legionella For Managers. Assists responsible persons with their ACoP L8 duties. Includes how enforcing authorities approach outbreak planning, site safety and compliance.

Legionella Cooling Tower Training

1-day course. £230 pp.
Covers current legislation, microbiological fouling, biocide treatments, scale and corrosion control, weekly and monthly monitoring regimes, assessing outsourced contractor competence, actions if Legionella is detected. For managers of Water Cooling Towers and Condensers.

IOSH Working Safely

1-day course. £195 pp.
Non-technical and entertaining introduction of safety in the workplace, defining hazard and risk, identifying common hazards, improved safety performance and environmental protection. For all staff with H&S best practice responsibility.

Confined Space

1-day course. £150 pp.
Designed for those working in a low risk confined space or lone working requiring the application of appropriate procedures.

Legionella Awareness

½ day course. £125 pp.
Condensed version of a one-day Legionella Control For Everyone course covering risk from Legionella, key control measures, ACoP, the importance of thorough risk assessments and accurate record keeping.

UKATA CAT A Asbestos Training

½ day course. £60 pp.
For those who have potential to come in to contact with asbestos and require basic understanding of asbestos.

COSHH Awareness

½ day course.
Understand the basics and application of the Control of Substances Hazardous to Health Regulations (COSHH) including chemicals, gases and biological agents including Legionella. Includes COSHH Regulations, your responsibilities, Material Safety Data Sheets, understanding COSHH assessments, identifying / controlling the hazards.

Dates for the diary 2018

Additional training dates are added regularly. Please contact us to ask if more dates are available, if training can be undertaken closer to you or if you require on-site training (accounting for 55% of all requests).

FAQs

How popular are our courses?

Since 1993, over 10,000 delegates have attended to fulfil compliance obligations and to be safe.

We already outsource water control safety, testing and compliance – do we need to attend?

Yes you do. Your staff need to ensure they are up to date and you need to be able to ask questions and hold your outsourced water treatment supplier to account.

What will staff get out of attending?

Courses are not designed to turn delegates in to safety experts. They are designed to be practical, reinforce why H&S is important and focus on Legionella risk management and control for private and public employers. Attendees get a certificate once they pass the course and firms are able to demonstrate they have complied with regulations and legislation.

About WCS Group

WCS Group are water treatment and control improvement engineer specialists. They provide water systems and process management, life cycle management, Legionella control, ACoP L8 compliance and training to help organisations reduce energy and water usage safely and reliably and remain compliant. A WCS Group company was a founding member of the Legionella Control Association. We are to ISO 9001, ISO 14001 and OHS SAS 18001 and an IOSH and COSHH accredited trainer.

WCS Group is the 'Water Treatment and Hygiene' division of the Marlowe Critical Services Group owned by parent Marlowe plc. The Group provides one access point for specialist 'highest standards' across 'Fire & Security', 'Water Treatment & Hygiene', and 'Air Quality'.
