

FOR RELEASE ON OR AFTER: AUGUST 23rd, 2018

The Self-Storage Building Experts at Janus International Achieve Ranking on Annual Inc. 5000 List of America's Fastest-Growing Private Companies

This is the companies fifth time on the Inc. 5000 list within ten years.

Temple, GA August 23, 2018 – Janus International, the leading global manufacturer and supplier of turn-key building solutions and new technology for the self-storage industry, has been listed as #2749 on the annual Inc. 5000 list. To be eligible for this prestigious listing, companies must be privately held, for profit, independent and based in the United States.

Making the Inc. 5000 list is just the beginning for the company: after a busy year filled with the release of new products and launching of new divisions, Janus continued to grow its team by hiring 140 full time and 413 part time employees in 2017 alone. Additionally, the company has experienced a three year revenue growth of 151%.

David Curtis, President and CEO of Janus International, commented on the list ranking:

"It's an honor and a privilege to see our company grow by leaps and bounds over the years, and being included on the Inc. 5000 list at this ranking is a tribute to our invaluable employees and top notch leadership team. Our success is a direct product of the hard work and tireless effort put forth by our entire team, and we're proud to be making leaps and bounds as the industry leader with new products like the SecurGuard® Smart Entry System and R3: Restore. Rebuild. Replace Program."

The R3 Program is designed to help owners restore, rebuild, and replace dilapidated elements of aging self-storage facilities. From door replacements to advanced security technology, this program adds exponential value through renovation and innovation, giving facilities the ability to raise their rents and improve customer experiences. With seasoned experts at the helm, R3 brings new life to stores and equips owners/operators with the tools to bring their businesses to the next level.

In addition to the R3 Program, the SecurGuard® Smart Entry System by Janus gives facility owners the opportunity to provide top of the line self-storage security and ultimate peace of mind to their tenants. The smart locks operate with an app through cloud technology, and enable both site managers and tenants to grant and restrict access when deemed necessary. Tenants can unlock gates, elevators, man-doors and unit doors by simply pressing a button on their smart phones (or key fob) thanks to Bluetooth technology, and it's the only truly cloud-based security access system available on the market today.
