superior product + recognized value
The Janus Model 650 Mini Storage Door is designed and manufactured with durability, quick installation and ease of maintenance in mind. Features standard to this door eliminate the need for extra options or upgrades. The best door…the best value...

That’s the Janus Advantage

**DOOR SPRINGS**
During production, each spring is coated with a generous amount of grease that penetrates the innermost pores of the spring with additives, displacing moisture and preventing the formation of rust and corrosion. In addition, this process relieves the friction created between spring coils, thereby providing a smoother door operation. Finally, the spring and axle assembly is enclosed in a tube to protect them from the elements encountered throughout the life of the door.

**RATCHET TENSIONING DEVICE**
The Janus ratchet tensioning device, supplied as standard equipment on our door, offers a simpler method of tensioning while more accurately fine tuning all the springs on the door at the same time. There is no extra hardware required. Eight different positions on the tension wheel allow one to perfectly balance the door every time. There are no pins required to hold the tension on the spring… you simply just click it.

**RADIAL BALL BEARINGS**
Janus supplies radial ball bearings at no additional cost to you. Our permanently-lubricated bearings require no maintenance and are guaranteed to last the entire life span of the door.

**DEAD AXLE & TORQUE TUBE ASSEMBLY**
This design, noted for its durability and smoother operation with commercial applications, has now been incorporated into the Janus self storage door. The tube housing protects the springs and strengthens the axle. Eliminating axle push and shift that can occur with a live axle, the dead axle design allows for a straighter travel path of the door curtain in the guides. The greatest feature of this design is that it affords the fine tuning of any spring adjustment to equally affect all springs on the door at the same time.

**DOOR STOP**
Our removable door stops are simple to install and prevent the curtain from over traveling the guide when raising the door.

**MAGNETIC ZINC COATED STEEL OR OPTIONAL STAINLESS STEEL LATCH**
Our patented mini latch features a cover plate made from a heavy gauge yellow zinc coated steel or optional stainless steel. In addition, the latch cover protects the slide from tampering by completely covering the slide, with the exception of a tab used to operate the latch. To further secure the door, the latch’s two inch throw, with its magnetic properties, can be incorporated with the new guide-mounted security devices. This versatile design affords you the ability to utilize padlocks, cylinder locks or both.

**DOOR CURTAIN**
The 26 gauge corrugated door curtain is manufactured from full hard galvanized grade 80 steel and coated with Super Durable polyester paint that is backed by a 40 year film integrity and 25 year no-fade limited paint warranty. Available in sizes up to 10’0” x 10’0” and in over 20 different colors.
Three manufacturing facilities located throughout the United States and a team of experienced door experts are available to assist you with any of your door needs.

Three year warranty on workmanship and material.

All DRUMS are fitted with a grease filled, shielded radial ball bearing to contribute to a smoother operation and reduce wear and friction.

Oil-tempered helical torsion SPRINGS are factory lubricated to minimize friction and corrosion while increasing the spring cycle life. Spring wire confirms to ASTM A 229.

Full width galvanized steel BARREL totally encloses the drums, springs and axle. Barrel-type construction reduces door sag, eliminates drum dents and improves operation due to an even support of the curtain for the entire width.

Galvanized and pre-painted with long lasting Super Durable polyester paint, the 26 gauge CORRUGATED CURTAIN is roll formed from ASTM A 653 grade 80 full hard steel. This premium steel yields greater door strength and minimized curtain damage. Full height felt tape on back of curtain prevents nesting and reduces paint rubbing. 20+ colors are standard, with others available on special order. Available in sizes up to 10’0” x 10’0”.

Roll formed, 18 gauge galvanized GUIDES are fitted with dual polyethylene wear strips to reduce friction and muffle door noises. All guide attachment to jamb is performed through the guides without the addition of clips welded to the back of the guide. This gives a neater appearance, increased strength and aids in tight installations.

Yellow zinc coated steel or optional stainless steel cover, slide and four attachment bolts are factory installed. The slide exhibits magnetic properties that can be used to activate a guide mounted security sensor. LATCH accepts all industry padlocks, including 7/16” diameter shanks. Provision for cylinder lock included.

Galvanized, guide-mounted HEAD STOPS are simple to install and prevent curtain over travel when raising the door. Installed through guide after curtain is lowered, they provide definite contact with the bottom bar angle and stop clips.

The RATCHET SPRING TENSIONER ASSEMBLY is factory installed on the end of the door axle and allows precise fine tuning of the initial spring tension. Increments of 1/8 turn are possible. Tensioner adjusts both springs equally at the same time from only one end of the door.

Roll formed clear acrylic coated galvanized steel BOTTOM BAR reinforced with a 1-1/2” x 1-1/2” 14 gauge full width galvanized angle that extends fully into the guides. The PVC bulb astragal provides positive contact with floor. Lift handle(s) and stop clips installed on exterior side of bottom bar and a non-rotting pull rope is attached to the inside angle.

The superior product + recognized value
Janus International Corporation specializes in the production of storage facility components, ranging from roll-up doors to self-sustaining hallway systems. The expertise and assistance provided to the customer, from designing the unit mix to the final job site punch out, is what sets our operation above the competition. Our meticulous attention to detail with the prints, manufacturing process, shipping, and installation offers every one of our customers the assurance that they are getting the best product available on the market. These qualities and services keep Janus’ customers coming back for all their self storage door requirements.

**INSTALLATION**

Time is money. Janus saves you time by shipping your self storage door with the latch, brackets and tensioner already in place. With the Janus door, you simply snap the brackets into the guides and the door is ready to stand. Comprehensive installation instructions are shipped with every job. Furthermore, an installation video is available on our website to show you just how easy it is to install.

**WARRANTY**

The Series 650 door and its components are warranted to be free of defects in workmanship and material for THREE YEARS. Our paint warranty offers a 40 year film integrity and a 25 year no-fade policy. Other provisions apply. Please refer to our official warranties on our website for specific details.
