SOLUPAY®

FOR **NetSuite**
SuitePayments

3D SECURE ADVANCED
WITH **SOLUPAY®**

REDUCE INTERCHANGE

ELIMINATE FRAUDULENT CHARGEBACKS

NOW WITH FRICTIONLESS CHECKOUT

FEATURES & BENEFITS

- Increased sales
- Fewer checkout abandonments
- Fewer false positives
- Improved margins
- Lower interchange rates
- Liability shift on chargebacks
- Less manual review
- Enhanced consumer experience
- Protected transaction flow without friction
- Authentication embedded in checkout
- Better than traditional 3-D Secure

CONSUMER AUTHENTICATION:
A means of authenticating a consumer directly with their card issuing bank during a card-not-present transaction.

With traditional 3-D Secure, all transactions are challenged, every time. This results in consumer friction, especially with frequent buyers who order regularly.

With Solupay's 3D Secure Advanced, available for SuiteCommerce Advanced and Site Builder, you control which transactions are authenticated via our rules engine. You can set up rules based on:

- Amount of transaction
- SKUs being purchased
- IP address or device used
- Shipping address, and much more

Exclusive to Solupay within NetSuite, and supported by the following major card brands:

Verified by VISA   **MasterCard SecureCode™**   **AMERICAN EXPRESS SafeKey℠**   **JCB J/Secure**   **Diners Club INTERNATIONAL ProtectBuy**   **UnionPay 银联**   **Maestro**   **elo**
