

Understanding Student Data Flow

DURATION: 1 Hour

What's covered in this class?

The following topics will be covered to better assist you with understanding student data flow between Mosaic POS, Free & Reduced, and MySchoolBucks.

- [Imports and Exports of Student Data](#)
We'll cover what imports are needed, how to perform an import, and when they should occur. This training will cover how daily processes can help you keep up with imports to make sure errors do not occur.
- [Understanding the Basic of MySchoolBucks](#)
Learn the basics of MySchoolBucks and its integration with Mosaic. We'll cover reporting and troubleshooting techniques that will help you better understand your student data.
