

# WIND DIGITAL INNOVATIONS (DI) FORUM

## MEMBERSHIP BRIEF

In Partnership with

## What is the Wind DI Forum?

An on and offshore wind industry-specific initiative that aims to enable a step-change in the use of data and digital technology to inform decisions and improve performance.

The Offshore Renewable Energy and Digital Catapults are collaboratively launching the Forum in 2019, with the first full meeting taking place in early 2020. ORE Catapult is providing match funding to support the initiative.

### Wind DI Forum Objectives

- 1 Strengthen the digital supply chain and attract it to the wind energy sector
- 2 Generate and deliver wind industry digital innovation projects
- 3 Share distilled project results and knowledge to the wider sector
- 4 Enable networking and develop relationships with supply chain and academia

### Structure

Membership of the Wind DI Forum is geared towards Data Owners and Data Managers who, through an executive committee, can directly benefit from working as a sector collective.

In addition to this, we also offer specific and contributory membership to Solution Providers, who can bring insight and depth of understanding from within and outwith the renewables sector.

Executive committee (Meet quarterly to lead programme)

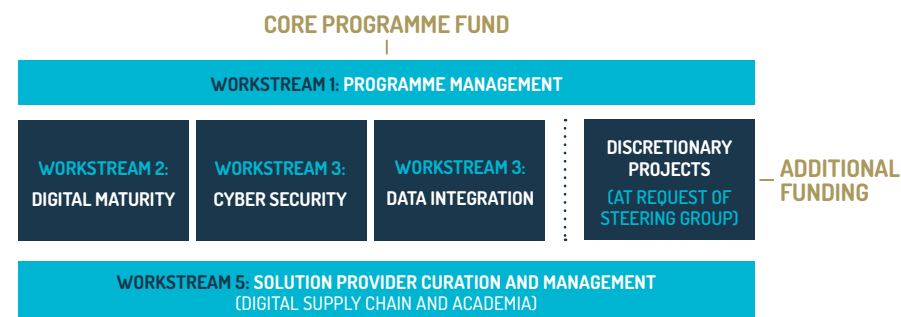

Solution Providers (deliver projects and present at events)

(Open to all solution providers in the wind energy and digital solution supply chain)

Wind DI Forum Structure ▲

## Programme Scope

### Benefits

	Wind Industry Executive Committee	Solution Providers
	Fixed annual membership fee	Tiered annual membership fee
<b>Frequency of meetings - role</b>	Representation at quarterly Executive Committee meetings to lead and influence programme scope	Attendance at half yearly meetings and networking event – contribute to Executive Committee strategy and delivery
<b>Projects</b>	<p>Prioritise projects and specify requirements</p> <p>Access project results and knowledge</p> <ul style="list-style-type: none"> <li>• Annual digital maturity assessment</li> <li>• Cyber security self-assessment toolkit</li> <li>• Data investigation results</li> </ul>	<p>Discover wind industry insight and solution requirements</p> <p>First access to challenge statements and project calls</p> <p>Direct involvement based on skills and capabilities</p>
<b>Supply Chain</b>	Exposure to game changing digital supply chain	<p>Recorded on digital supply chain map available to problem holders</p> <p>Access to ORE Catapult Fit4Offshore Renewables programme</p>
<b>Events and Knowledge Sharing</b>	Attendance at all engagement events, meet with Solution Providers and wider supply chain/academia	Attendance at all engagement events Meet Data Owners and Data Managers and wider supply chain and academia

## Wind Industry Exec Committee

## Annual Subscription

Any

£14,500

## Solution Provider Membership x yearly turnover

## Annual Subscription

£50m +

£14,500

1m – 50m

£7,250

Sub £1m

£1,000

## Join Now

The Wind DI Forum plans to be the leading data and digital forum within the wind sector. Places will be limited to ensure effective contribution and delivery of quality projects that will benefit its members and the wider sector.
