

# Google Reviews Services

## 5-star care deserves a 5-star reputation!

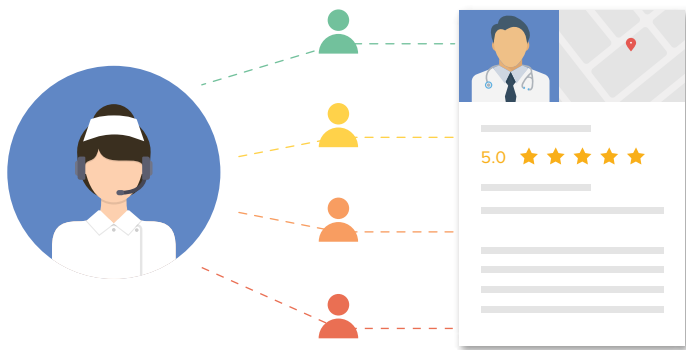

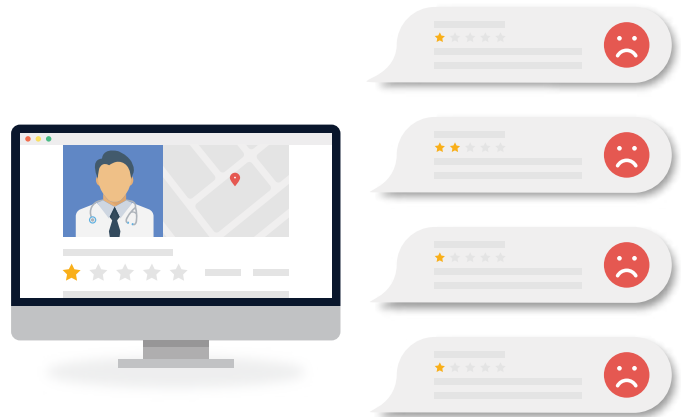

### Your Patients Have Options!

**93%** of consumers rely on reviews and star ratings before choosing any product or service.

**77%** of patients search online before visiting a doctor

### The Problem

- Digital patients are consumers. Consumers have choices. If they see even one single negative physician review, **they will avoid you like the plague.**
- One angry patient who sat in your waiting room too long can **forever tarnish your online reputation with a 1 Star Rating.**
- Busy medical practices don't have time to fix negative online patient reviews, and your practice can't heal patients you can't see.

### The Solution

- Our clinical nurses call your patients and conduct satisfaction surveys.
- We direct your happiest patients to write online reviews on Google, Yelp, and webMD.
- We schedule follow up appointments with patients to fill up your calendar.

### Service Benefits

**Traffic** - More google reviews with the right words increases your website's search engine ranking.

**Revenues** - More website traffic means more patients and more practice revenues.

The peace of mind of a **5 Star Reputation.**
