

AR Management

**Collect more money, on time,
and with less effort!**

With DrCatalyst's AR Management service, we can automate and manage your entire collections process to give you fast, efficient, and automated payments.

Efficient Payment Procurement, Faster Cash Cycle

To ensure that payments are collected, our remote staff regularly check patient balances and send patient statements. Our team gets in touch with the payer, tracks the status of the claims, and **makes sure that the ERAs and EOBs are sent so that you'll get paid on time.**

Our remote staff handle insurance records as well. They can verify the patient's insurance coverage, and correct every rejected claim to have it approved for resubmission. We retrieve the necessary funds, focusing on your AR that are 60 days old. Our team also bills or rebills claims, writes off balances, and tracks the collection status of all your receivables.

Error-Free Billing Results, Decreased Operational Cost

Each billing-related process is assigned to a dedicated remote employee, reducing errors and increasing efficiency. You don't need to change your current staff, process, or technology and instead, you can have the leeway to focus on other activities that generate more income.

With DrCatalyst, you can enjoy a better way of getting paid faster, improve your business performance and increase customer satisfaction.

To help you secure the necessary payments on time, **our remote team streamline your accounts receivable management without interrupting your standard workflow.**
