

Patient Statements

Provide your patients with a quick, accessible, and fully electronic payment process!

Achieve quick and efficient patient billing with a remote team that generates electronic patient statements for you. All your staff needs to do is mail them to your patients!

Quick and Customizable Patient Billing

Printing patient statements is just too time-consuming and resource-intensive, but it gets you paid significantly. Our goal at DrCatalyst is to eliminate the hassle on your end, and simply get you paid.

Our Patient Statements service offers you a remote team that **prepares and generates patient statements on a daily, weekly, or monthly basis**—depending on your preferences.

We can do it in three ways:

- Our team of billing experts process the patient statements for your clinic. Then, they send the PDFs to your office so all your staff has to do is print and mail them.
- Through an integrated statement mailing partner called BillFlash, we can generate and release electronic patient statements for you at no extra cost.
- If you're using a patient portal, we can upload the patient statements there so your patients can directly download their statements upon release.

Patient-Friendly Billing Operations

We make it easier for your patients to get their statements and pay you for your services.

By intensively reviewing billing information, especially the patient balance, we guarantee that patient statements remain accurate and error-free. **We also check if there's open credit, and we reconcile balances before issuing another statement.**

As experts in administrative support, our staff can help out your patients with their concerns regarding their statements. To ensure that the statements reach their recipients, we get in touch with and follow up patients.

We can even generate collection letters to make sure that the patients are reminded about their payments and that they are collected on time.
