

Sustainable Solutions for Health, Productivity and the Environment.

Waste Water Management

Sustainability

Our water management programs are designed to protect and enhance equipment life while providing energy and cost savings through improved heat transfer efficiency. Our goal is to build sustainable programs for water management by focusing on financial benefits, environmental stewardship and improvements to workplace health and productivity.

Wastewater

Environmental regulations and public concern for environmental issues are on the rise. Frequently there are increases in your level of responsibility as an operator of a waste treatment plant.

Zero Discharge, Water Recycling, Environmental Compliance, Surcharge Reduction, BOD – COD – FOG Removal, Odor Elimination, Oil Separation...these are only some of the issues facing industry and manufacturing today.

Rochester Midland has experience in nearly all types of production and manufacturing. Our consultant representatives will work on-site with your staff to develop a program centered around meeting your environmental goals, reducing your operating costs, and keeping you in compliance.

- Coagulants
- Flocculants
- Defoamers
- Bioaugmentation
- Odor Control
- Chemical Application Systems

A Delicate Balance

Rising costs and stringent government regulations critically affect your water treatment program. Increasing public expectations continue to pressure industry to meet new environmental challenges. Balancing these elements requires knowledge, technical skill, keen judgment and application experience.

Rochester Midland will help you achieve that delicate balance.

Custom Engineered Solutions

There is no one specific way to solve water management problems. Each circumstance must have its own carefully measured solution. Our commitment to our customers is to provide the most cost effective, efficient program. Our team of experts partner with you to develop the best approach to your unique water management system. More often than not, innovative methods are essential in resolving your unique treatment challenges. Rochester Midland's team of highly trained experts have developed the skill to solve the most unique and difficult water management problems.

Layers of Regulations

Heightened awareness of clean water issues among everyone from school children to governments around the world, has led to stricter and more complex regulations. Failing to comply with these regulations has led to increasingly stiff penalties. The maze of regulations begins in your own community, and then becomes entangled in regional, state and federal regulations.

Our trained specialists will guide you through the regulation labyrinth to develop solutions for your specific compliance requirements.

Value-Added Programs

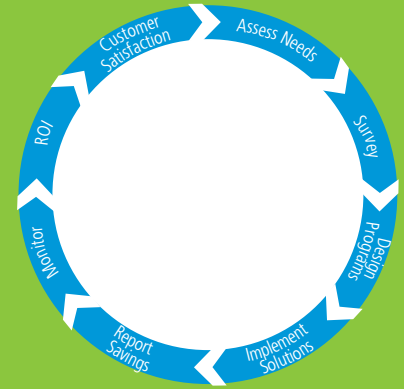

Our value-added programs will achieve optimum results while providing you with a return on investment.

We design treatment programs that will put you in compliance, avoiding costly fines, or production losses or down time. Our comprehensive approach optimizes your water treatment results while minimizing your water, chemical and energy usage. Our trending software allows you to track costs and savings. Rochester Midland's staff is the finest in the industry, with three levels of technical support to assure the optimum water management programs for your specific requirements. Our total management programs monitor results to assure that these requirements are met, generating a positive return on your investment.

Call us today at 800.RMC.4448 to set up a survey and evaluation of your current conditions or visit www.rochestermidland.com

The RMC Difference

Assess and Survey – We will conduct an extensive survey and evaluate current conditions.

Plan and Design Program – A water management program designed specifically for your system, including chemicals, dosages, feeding techniques and operating standards including benchmarks for measuring success and timing of all segments of the program.

Implement Solution – Training for your team to introduce the treatment plan.

Monitor – Our technical specialists work with your operating personnel to assure that proper control limits and operating parameters are maintained. Projected return on investment (ROI) is compared to actual results to document savings.

Environmental Health and Safety – Material Safety Data Sheets are available on-line at www.rochestermidland.com in both English and Spanish, and are accessible 24 hours a day, seven days a week. Rochester Midland provides on-site client training in safe handling of our products. Product formulations meet FDA and potable, as well as environmental discharge requirements. Letters of guarantee are available upon request.
