

How to identify a suitable area for developing a specific dwelling type

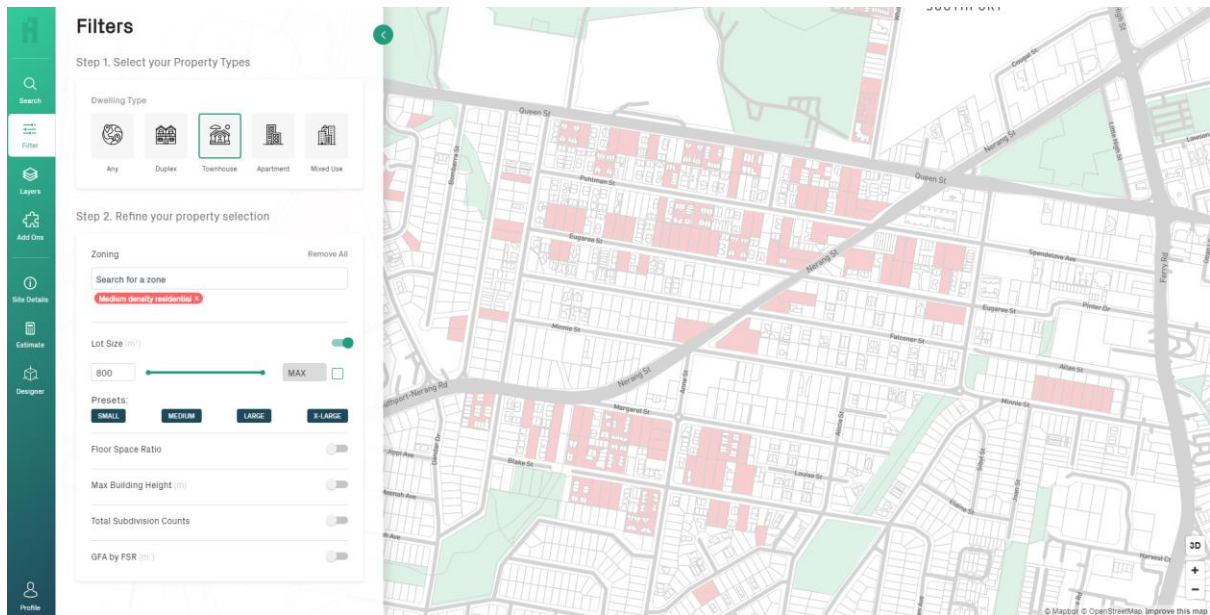

1. Click on “Filter” from the left-hand menu.

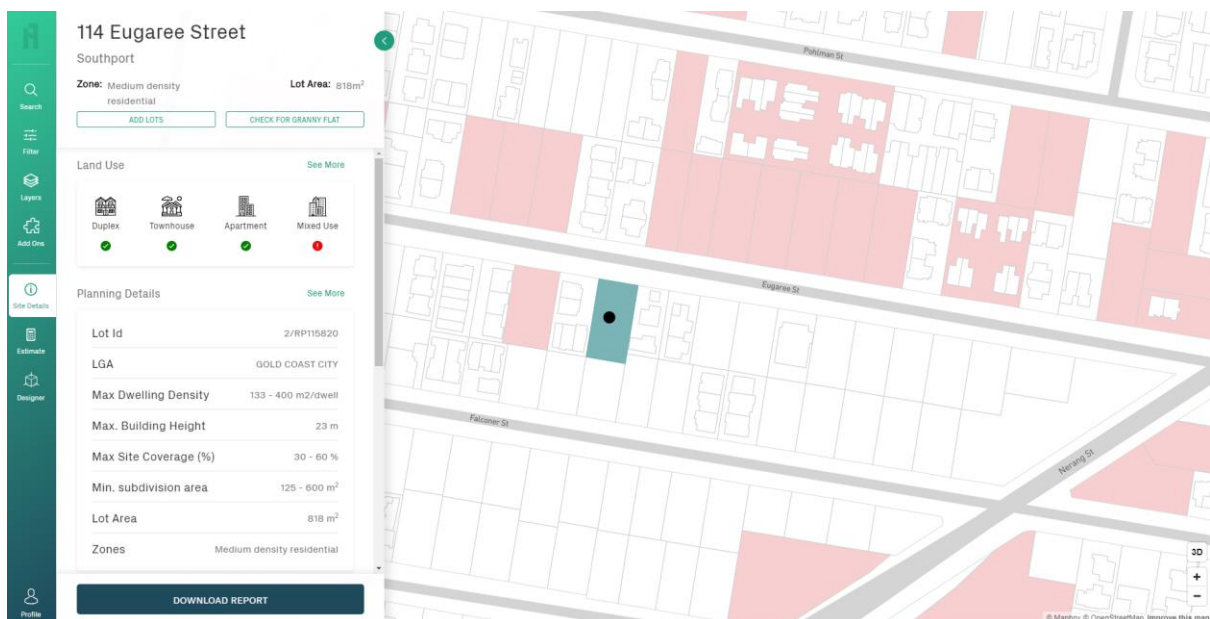

2. Select a dwelling type of interest (you can select multiple options).

- Refine your search criteria by adding in additional filters such as zoning or minimum lot size. As you add more filters, less properties will be highlighted.

- Navigate around your target area and for more information on a specific site, simply click on the lot.
