

ELN Services

Guiding you to an Exceptional Destination

Life Sciences companies are under constant pressure to increase their drug pipelines, accelerate discovery, and maximize the level and quality of collaboration both internally and externally.

To meet these goals, organizations selected and implemented Electronic Lab Notebooks (ELNs). Initially, ELNs were implemented as simple electronic substitutes for paper notebooks which, while successful, yielded only limited benefits.

Today, to truly meet these goals, ELNs are being extended to increase the breath and utility of their data structures and captured metadata. Additionally ELNs are being integrated to lab instruments, data manipulation and visualization solutions, and other enterprise systems. Simultaneously, the proliferation of ELNs to other internal departments, CROs, CMOs, and other academia and commercial partners beyond the initial pilot areas is also being actively pursued.

CSols has the expertise, experience and tried and true processes to help guide the next phase of your successful ELN project.

Knowledgebase:

- Abbott Informatics
- Agilent Technologies
- BIOVIA
- Core Informatics
- Dotmatics
- IDBS
- Lab-Ally
- LabVantage
- LabWare
- PerkinElmer
- ThermoFisher Scientific™
- Waters

ELN Health Check

CSols' ELN Health Check is designed to provide you with comprehensive information to enable you to get the most from your ELN investment. Our process, developed leveraging best practices, will...

- Document the Current State of your ELN implementation
- Identify your ELN implementation Strengths, Weaknesses, Opportunities and Threats (SWOT)
- Develop and define the Future State of your ELN implementation
- Provide you with a Roadmap on how to get to the Future State

During the Health Check process, information is gathered and developed through a series of subject matter expert and process owner interviews, business and application briefings, and workshops. The end result of these efforts will ensure that you have everything you need to assist in identifying and planning the next phases of your ELN evolution.

Deliverables include:

- Information and Process Maps & Use Cases (Current State and Future State)
- ELN SWOT analysis document
- ELN Gap Analysis document
- Automation and Integration maps
- ELN Future State Requirements document
- ELN Roadmap

Complete ELN Services Suite

- Health Check
- Integration (Systems & Instruments)
- Extensions & Enhancements
- Selection
- Implementation
- Project Management
- Training

ELN Benefits from CSols

- Improve and support information sharing & collaboration
- Reduce redundant research effort
- Increase speed of information searching and retrieval
- Improve efficiency and effectiveness
- Reduce your discovery lifecycle
- Increase the speed of your NDA filings
