Alexandra Palace - case study

Project overview

We were appointed to undertake a refurbishment and demolition survey to specific areas of the Grade II listed entertainment venue. We are proud to have delivered such a service to a huge landmark such as Alexandra Palace.

Why us?

Our team of asbestos surveyors have gained significant experience in buildings that are subject to listed status or within conservation areas.

The challenge

The building was to remain in operation and occupied by the public throughout the works, so we had to ensure that any disruption to the building's operation was at an absolute minimal.

What we did

To address and overcome this and other challenges, multiple pre-start site meetings were held between ourselves and our client to ensure we considered all relevant issues prior to commencement.

Our achievements

Our proactive approach identified the need for our fully equipped, trained and experienced surveyors to work in confined spaces with all required safe working practices.

Our extensive planning and forward thinking approach to all of Alexandra Palace's issues were mitigated and led to a successful project that was completed on time and within budget.
