

DATA PRIVACY AT SAMASOURCE

At Samasource, security and trust are our top priorities. We're committed to helping our clients comply with data privacy regulations like GDPR and being your trusted training data strategy, annotation and validation partner.

The General Data Protection Regulation (GDPR) applies to any company that handles the personal data of residents in the European Union (EU) and European Economic Area (EEA). Because Samasource works with companies who serve customers in the EU and EEA, as well as clients based in the EU and EEA, the GDPR applies to our business.

Additionally, as a global enterprise that strongly supports data protection and privacy regulations, we offer clients the personal data protection rights under the GDPR, wherever they live.

HOW SAMASOURCE PROTECTS YOUR PERSONAL DATA

The GDPR separates data protection responsibilities into two categories: controllers and processors. Samasource is GDPR compliant as a data processor and therefore adheres to all requirements related to the processing of personal data based on documented instructions from our clients.

PII, GDPR AND SECURITY AT SAMASOURCE

Privacy and security are fundamental design requirements in our technologies, services, business practices and operations. We're dedicated to ensuring all the information you share with us is kept secure and that you're in control of who can access it.
