

Better Together

BetterCloud

You've made a great decision by choosing BetterCloud to manage and secure your SaaS applications. Are you ready to take it to the next level?

BetterCloud enables you to use G Suite and other core SaaS apps to their full potential when it comes to security, workflows, maximizing your spend with effective licensing management, reducing risk and protecting your company's information.

Onix and BetterCloud have combined forces to offer the following three packages:

BetterCloud Deploy

For new BetterCloud customers, the "Deploy" package includes:

- Installation of Bettercloud
- Discovery workshops to develop Workflow automations for user onboarding/offboarding, DLP, and/or security policies.
- Security workshops and implementation to secure your environment
- End-user training for changes to your environment based on Bettercloud policies
- Admin training for using Bettercloud

BetterCloud Secure & Evolve

Are you already using BetterCloud today, but need additional help with adoption and/or want to ensure you are meeting security best practices? The "BetterCloud Secure & Evolve" package includes:

- Full security scorecard evaluation of GSuite domain & BetterCloud configuration
- Technical workshops to evaluate current configurations within GSuite and BetterCloud
- Trainings for Help Desk, delegated admins, and admins
- Assistance with end user communications around newly implemented policies

BetterCloud Integrate

Take advantage of the BetterCloud APIs to enable connection between on-prem or cloud apps and BetterCloud. The "BetterCloud Integrate" package includes:

- Net new application integration
- Existing / on-prem solutions to BetterCloud
- Consultation, including leading training classes for your development team
