

# ON-PREMISE VOICE

**Effective communication is at the  
center of every successful business.**

The key to success for your business is the ability for your employees, clients and vendors to communicate live, on-demand – from any location, on any device, at any time. Our customizable voice solutions deliver robust business communications for both small businesses and large enterprises with multiple locations, mobile workers and unique technology needs.

**Transformyx  
On-Premise Voice  
solutions are  
built on a firm  
foundation of  
specialization in  
communications  
collaboration.**

# ON-PREMISE VOICE

**Having achieved Cisco's Advanced Collaboration Architecture Specialization, we are uniquely qualified to design and deploy best-in-class conferencing and collaboration solutions which include an exceptional level of customer care.**

*Benefits of On-Premise Collaboration:*

## **Conferencing**

Communicate with colleagues, customers and vendors on your terms. Securely collaborate on-demand with highly scalable video conferencing, web conferencing and management solutions which enable you to increase meeting productivity from your desktop, mobile device or conference room.

## **Endpoint**

From individual video desktops and IP phones to large-scale video conferencing across multiple locations and business-class voice and video on your mobile device, you can easily streamline communication and increase efficiency. The ability to effortlessly move between devices throughout your busy day also delivers a seamless user experience.

## **ADDITIONAL TRANSFORMYX SERVICES FOR VOICE:**

### **Customer Care**

At Transformyx, we understand that your company's communications must adapt to the way you do business and be available on-demand. We feel the same way about the support we provide to our clients. 24/7 network monitoring, rapid response and personalized service are the cornerstones of Transformyx's customer care and are included with all our services.

**We have formed a strong partnership with industry leader Cisco, combining our premier engineering expertise and industry certifications with Cisco's Unified Collaboration line of communication solutions.**

Partner

## **Colocation**

Transformyx provides enterprise colocation services in our two state-of-the-art data centers in Baton Rouge, Louisiana, and Dallas, Texas. We are laser-focused on providing the highest levels of security, availability and redundancy of power and bandwidth to ensure that your business communications never miss a beat. And with the network architecture already in place at both Transformyx data centers, hosting your unified communications at one of our facilities is stress-free. Additionally, Transformyx has the ability to provide SIP services out of our Baton Rouge data center facility.

## **Managed UC**

Let us take the burden of IT management off your shoulders with our Transformyx Managed Unified Communications service. Our expert team of technical professionals will provide daily monitoring, management and maintenance of your entire unified communications system, whether on-premise or colocated. In addition, we will be responsible for all testing, troubleshooting, configuration and on-site and remote support, freeing you up to focus on your core business.
