DISASTER RECOVERY
AS A SERVICE

Transformyx's Dallas data center allows us to offer our customers an out-of geography disaster recovery solution.

Transformyx
DATA CENTER · VOICE · IT SECURITY

Regardless of size, all organizations are expected to have their core information systems up and running all the time. Providing the ability to recover from downtime—scheduled or unplanned—is becoming easier and more affordable thanks to new disaster recovery (DR) and cloud technologies that make enterprise-grade cloud-based Disaster Recovery as a Service (DRaaS) a viable option.

Transformyx, Zerto and Veeam have partnered together to bring you the benefits of an Always On solution where you're not alone. Transformyx's support team is available by phone, email and ticketing system to address your questions – large and small.

BENEFITS OF DRaaS THROUGH TRANSFORMYX

- **Full and partial failover** with built-in network configuration

- **Easy configuration** straight from your on-premise Zerto and Veeam console

- **End-to-end encryption:** Encrypt data in-flight without impacting compression or configuring a VPN

- **Self-service testing**, on-demand, through your Zerto and Veeam console

- **Complete backup and DRaaS option** from one Zerto and Veeam console backup and full disaster recovery

10Gb connectivity between our data centers makes Always On availability a reality for all our DRaaS customers.
