Why dental care is a critical component of your well being

Overall health starts with maintaining a healthy mouth.

Studies show there's a link between your mouth and the rest of your body. In fact, gum disease increases your risk for heart disease, high blood pressure, stroke, diabetes, and cancer. **Keeping your mouth healthy helps prevent serious health problems down the road.**

Comprehensive and affordable.

Maintaining a healthy mouth is not a financial burden when you are covered by a CarePlus Group Managed Care Plan. Your family, friends, and coworkers are counting on you to stay healthy and be your best for them, and our comprehensive and affordable dental plans can help you do this.

The advantages of an integrated group dental plan

Everyone is searching for the key to wellness.

A quality, appropriately-designed and utilized dental plan can help improve your wellness **without breaking the bank.**

Not all dental plans are equal!

CarePlus offers a **comprehensive dental plan** with **exceptional customer service.** With a typical dental insurance company, the only relationship between the company and the dentist is a fee schedule. However, CarePlus' managed care plans are integrated with our participating dentists.* We frequently communicate with these dentists and have formed a unique bond. With traditional dental insurance, a dentist must file a claim with the insurance company and then you wait and wonder what will be covered. With a CarePlus Group Managed Care Plan, **there is no filing of claims at many of our network providers; you know what is covered before you leave the chair.** At CarePlus, we handle all of this, offering you **peace of mind and ease of administration.**

CarePlus also values transparency with our members.

In fact, you can **read real ratings and comments from many of our in-network providers' patients on their websites!** We want you to feel comfortable when choosing your dental provider and rest assured they'll provide you the quality care you deserve.

Access to an comprehensive dental network.

As a member of a CarePlus Group Managed Care Plan, your provider network is integrated. Many of our network dentists provide all specialties, including **general dentistry**, **pediatric dentistry, braces and orthodontics, oral surgery, dental implants, endodontics**, **dentures**, **and more!** All these dental specialists work together on a consultative basis to ensure your care is integrated, effective, and comprehensive.

**Integrated oral health services are provided when you visit Dental Associates – the principal provider partner in the CarePlus network. Dental services may also be available through additional network providers with lesser degrees of integration.*
