

Antibody Specification Sheet

Anti-Human Nerve Growth Factor (hNGF) - Biotin

Catalog reference: AS18-B

Size: 0.2 mg

Antibody Information:

Antigen: human recombinant nerve growth factor (hNGF).

Ig Class: mIgG1.

Form: biotin conjugated

Specificity: recognizes human, bovine, viper and mouse 2.5S, 7S & β NGF. The epitope has been localized to the C-terminus of hNGF.

Antibody Source: monoclonal antibody from BALB/c-derived hybridomas.

Production: *in vitro* cell culture.

Purification: Protein A agarose chromatography.

Purity: $\geq 95\%$.

Formulation: provided as a 0.2 μ m sterile-filtered solution

in Ca^{++} & Mg^{++} free Dulbecco's PBS with 0.05% sodium azide.

Concentration: 1 mg/ml.

Recommendations: ELISA.

Storage conditions: store undiluted at 4 °C or in aliquots at ≤ -20 °C.

Applications:

Elisa: This antibody has been used as a solution phase antibody at 2 μ g/ml in a two site ELISA with AS19-P for mouse NGF and AS22-P for human NGF. Typically for human NGF, the ELISA has a working range of 0.1 -15 ng/ml and a sensitivity of <0.05 ng/ml with the appropriate standard. Recommended sample volumes are

25-200 μ l. Recovery of human NGF in human plasma is typically > 90% in the ELISA. The use of Tris buffer, pH 7, instead of PBS is recommended. (Kenney, JS, Masada, MP, and Allison AC, *Laboratory Methods in Immunology*, Vol. I, 231, 1990).

FOR RESEARCH USE ONLY. NOT FOR USE IN DIAGNOSTIC PROCEDURES
