

DTEN D7 is an All-In-One, Plug and Play Video Conference Room Solution with Interactive Whiteboarding

Simple Set-Up in Minutes

Comprehensive components right out of the box. Simply plug and play to get started.

Optimized for Video Communications

Connect with up to 1000 video participants across mobile, desktop, and meeting rooms.

Versatile for any Type of Space

Deploy DTEN D7 with Zoom Rooms in any type of meeting rooms.

Collaborate More Productively

Share presentations and whiteboard with in-room and remote participants.

Powerful, Simple and Affordable

As a plug-and-play solution, DTEN D7 includes all the core components that enable a frictionless video conferencing experience powered by Zoom Rooms for Touch.

Out of the Box, it Requires No Software

configuration or complex IT support integration, making it easier and more affordable than ever to bring the power of collaborative video to any space.

Bringing Together the Best of Software and Hardware

DTEN has combined the power of groundbreaking interactive hardware technology with best-of-breed software-based video conference room solution, Zoom Rooms.

Best-in-class mic array with 16 directional microphones clearly picks up the voice of the speaker. A 4K wide-angle camera provides a face-to-face in-room experience for remote participants. Proprietary DSP from DTEN and Zoom, keeps voices crystal clear and distracting background noise to a minimum.

DTEN

DTEN D7 and Zoom Rooms

DTEN Inc. has teamed up with Zoom Video Communications, both leaders in modern enterprise video communications solutions, to develop the DTEN D7 for Zoom Rooms. The interactive, adaptive, All-In-One whiteboard instantly creates smart, face-to-face meeting experiences. With AI technology integrated into a visual collaboration platform combined with Zoom's popular cloud-based video communications, The DTEN D7 for Zoom Rooms is changing how enterprise companies meet and work together.

D7 for Zoom Rooms automate and innovate workplace meeting set up and management with a compact AI video conference system that is wireless and customizable for meeting space, size, and participant needs. Teams can easily meet and collaborate together face-to-face, either remote or in-office, in clean modern workspaces for video conferencing, digital whiteboarding, or presentations. AI technology enables automatic speaker tracking, face detection and learns lighting and audio patterns to adjust to different environment space settings. Meetings can be recorded to the Zoom cloud for easy sharing.

"Zoom is here to take the work out of meetings," said Oded Gal, head of product management for Zoom. "Working with DTEN is a great way to do that. Teams across the globe are empowered like never before with a new way to collaborate together, as if they were in the same room, instantly and seamlessly every time."

Key DTEN Board Features and Benefits include:

AI Powered Face-to-Face Experience

- All-in-one central AI conference system that automatically customizes lighting, visual, and audio for each meeting space
- High quality visual and audio technology that gives remote participants the same in-room look and experience.
- Spotlight Video Conference - AI powered tracking, active speaker and face detection (Zoom in on active speaker)

Clean Meeting Space with Seamless Technology Integration

- Highly Integrated Interactive Whiteboard, that can be used at the same time from multi-located participants, with touch screen, high resolution 4K camera, 16 element microphone array and video conference
- Companies of all sizes have a high quality solution that can transform any space into a modern, collaborative team space.

Hassle Free and Affordable Solution

- DTEN collaboration tools are plug and play frictionless, and require zero learning for users and zero IT support. Users can easily make it work by themselves.
- DTEN technology drives cost savings with everything you need in one solution. No integration or expensive design costs.
