

Elbit Systems of America appraised at Level 3 by CMMI

Elbit Systems of America has been appraised at Level 3 of the CMMI Institute's Capability Maturity Model Integration. The appraisal assessed hardware and software development for Airborne Business Solutions and Sensors and Fire Control Solutions in our Merrimack and Fort Worth operations.

CMMI is a capability improvement framework that provides organizations with the essential elements of effective processes that ultimately improve their performance.

An appraisal at maturity level 3 indicates the organization is performing at a "defined" level. At this level, processes are well characterized and understood, and are described in standards, procedures, tools and methods. The organization's set of standard processes, which is the basis for maturity level 3, is established and improved over time.

CMMI Institute is the global leader in the advancement of best practices in people, process and technology. CMMI Institute's promise is to inspire cultures of continuous improvement that elevate performance and create sustainable competitive advantage.

Elbit Systems of America has 25 years of experience as a leading provider of high performance products, system solutions and support services that focus on the defense, homeland security, commercial aviation, and medical instrumentation markets. Elbit Systems of America is dedicated to supporting those who contribute daily to the safety and security of the United States.
