

# RWS – L

## Remote Weapon Station – Light (7.62 mm)

Elbit Systems Of America's 7.62mm Remote Weapon Station – Light is designed for performance in harsh battlefield conditions. All weapon station functions are remotely operated from the crew compartment without exposing the crew to danger. The unique design is based on years of battlefield experience in full scale and low intensity conflicts.

### Features

- Low silhouette
- Remotely operated (under armor)
- Large ammunition capacity (600 rounds, upgradeable to increased capacity)
- Fully stabilized
- Remote charging mechanism
- Remote safety switch
- Digitally controlled
- Dual-axis stabilized weapon station for 7.62 mm and smaller caliber machine guns
- Add-on system, fully overhead (no penetration into vehicle interior)
- Soft recoil mount for increased accuracy
- Electrically operated

# RWS – L

## Remote Weapon Station – Light (7.62 mm)

### Features

- Electrical stoppage clearing mechanism, remotely operated
- 600 round magazine upgradeable to 1150 or more
- Backup manual operation for emergency use and maintenance

### Technical Specifications

- Azimuth travel: n x 360°
- Elevation travel: -20° to +60°
- Day camera: dual FOV CCD
- Man machine interface in the vehicle:
  - Multifunction display
  - Control handle
- Weight: < 125Kg. (without ammunition)
- Height: < 500 mm
- Base diameter: <560 mm

### Options

- Automatic target tracker
- Laser range finder
