

Ten reasons why leading businesses choose MailGuard to bolster Office 365

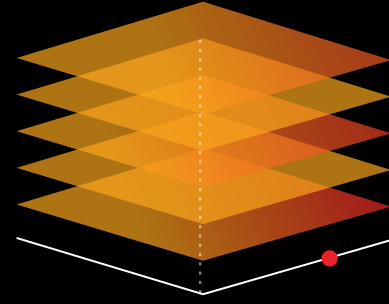

1

Speed to detect & stop email threats

MailGuard is consistently ahead of the market in detecting & stopping new threats.

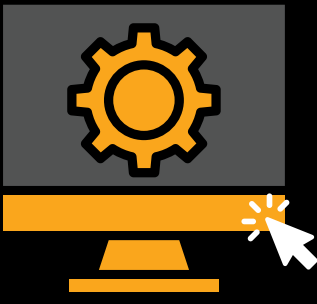

2

Multilayered approach

Working seamlessly with Office 365, MailGuard offers defence in depth for advanced threat protection.

3

Simple customer experience

No software to install, no updates required - just a simple-to-use, cloud-based solution to protect your business.

4

Real people to help 24/7

We understand that security is about people and data - so MailGuard provides real people, on hand 24/7 to help when you need it.

5

Co-located team of experts

Our engineering, operations and support teams are co-located, to share their knowledge directly with MailGuard customers.

6

Proactive & pragmatic approach

While other providers might hope you don't notice if a threat reaches your users, MailGuard will proactively reach out to help with remediation.

7

Relentlessly focused on stopping threats

We're the first to acknowledge that cybersecurity isn't a pretty business, so we don't waste resources on fancy interfaces or pretty reports - MailGuard stays focused on stopping threats.

8

Integrated email security suite

MailGuard's holy trinity of email security works to keep your business & data safer than any other suite.

9

Gold
Microsoft Partner

Collaborative security approach

MailGuard works to support the technology partners you already work with, for a collaborative approach to cybersecurity.

10

Committed to user education

MailGuard is constantly publishing a wide range of materials to help keep your users alert.
