

SKIN CANCER BUSINESS MANAGEMENT

PROGRAM OVERVIEW

[LEARN MORE](#) 

This online course is designed to assist medical practitioners, medical business owners and practice managers with the set-up and management of a successful skin cancer clinic or the integration of skin cancer services into general practice. The knowledge acquired will help you maximise your efficiency in managing skin cancer in primary care. You will also gain valuable insights into how you can develop your business and grow your practice.

COURSE OBJECTIVES

Learn the fundamentals of setting up and running an efficient skin cancer service in the primary care environment.

ACCREDITATION
