

SKIN CANCER SURGERY

PROGRAM OVERVIEW

Surgery is still considered the most effective skin cancer treatment. With limited access to surgeons and year-long waiting lists at public hospitals, patients depend on skilled general practitioners who can offer an immediate solution to their concerns. This program is ideal for acquiring and honing various surgical techniques in the management of more complex skin cancer cases. This will allow you to minimise referrals and become a referral option for your peers. The Professional Certificate of Skin Cancer Surgery will extend your knowledge in performing large elliptical excisions, flaps and grafts. The Advanced Certificate and Professional Diploma courses will teach you how to remove skin cancers from anatomically complex and cosmetically sensitive areas.

DELIVERY FORMAT

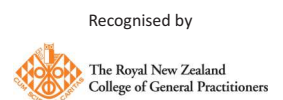

The certificate courses feature highly practical sessions with supporting theory and focus on different anatomical areas. The program is delivered face-to-face in a small group setting with experienced skin cancer doctors and a team of surgical assistants to guide you as you practise the procedures on pork parts.

PATHWAY OPTIONS

This university quality-assured three-part program consists of the Professional Certificate, Advanced Certificate and Professional Diploma of Skin Cancer Surgery. Upon completion of the program, graduates can apply for Accreditation of Prior Certified Learning (APCL) for module 2 of the Postgraduate Diploma in Minor Surgery studied through the Rila Institute of Health Sciences and awarded by the University of Plymouth (UK). To gain more hands-on experience, course graduates are encouraged to complete a clinical attachment at a dedicated skin cancer facility.

The Skin Cancer Surgery Certificate Courses and Professional Diploma have been collaboratively designed with and are annually reviewed by Professor David Wilkinson, Deputy Vice Chancellor at Macquarie University.
