

DERMATOPATHOLOGY MASTERCLASS

ONLINE

WWW.HEALTHCERT.COM/DPMCL

The Dermatopathology Masterclass offers a comprehensive guide to the principles of dermatopathology and will help you understand and interpret pathology reports. Led by experts in the field, the masterclass will develop your overall diagnostic skills to an accomplished level and teach you what dermatoscopic features correlate with histology slides.

This online masterclass will improve your ability to communicate with dermatopathologists, potentially question reports that are inconsistent with your dermatoscopic findings and make predictions about the specific histological diagnosis. You will learn how to assess features of normal skin, melanocytic lesions, tumours, naevi and inflammatory conditions, and will be equipped with the know-how to apply this knowledge in the primary care setting.

COURSE OBJECTIVES

Enhance your knowledge of skin pathology, biopsies, histology and dermoscopy in order to diagnose and manage the majority of skin lesions encountered in primary care.

ENTRY REQUIREMENTS

No previous training required.

ACCREDITATION

RACGP and ACRRM points pending.
Please see website for updates.

TOPICS COVERED

- Introduction to dermatopathology
- Histology
- Biopsies
- Dermoscopy
- Specimen processing
- Melanocytic lesions
- Non-melanocytic lesions
- Dysplastic naevi

PRESENTERS

Prof Cliff Rosendahl

Course Coordinator MMed (Skin Cancer)
The University of Queensland

Dr Simon Clark

Histopathologist & Lecturer
The University of Queensland

Learn from noted experts in the field, with over 60 years' experience in general practice, skin cancer medicine and dermatopathology education for GPs.

DELIVERY FORMAT

The masterclass is delivered entirely online. It consists of eight modules and is supported by online materials including pre-reading activities, individual assessment tasks and two online examinations.

DATES | ONLINE

Start your online studies at any time after 13 Jan 2020.
