

A New Compute Experience

powered by **HPE ProLiant Gen10**:
the world's most secure Industry Standard Servers¹

Digital transformation is all about accelerating innovation. The right mix of IT is key to that digital transformation. A new style of business demands an IT experience that is centered on business outcomes and provides consistent and predictable agility, security and economic control across hybrid IT. Only Hewlett Packard Enterprise is uniquely able to deliver on this new IT experience not only because of the incredible innovation already brought to market such as composable infrastructure but now enhancing the whole experience with a new generation of capabilities powered by Gen10 that offer customers the ability to accelerate applications and business insights.

HPE ProLiant Gen10 Servers enable customers in the following **three key areas**:

Agility

Accelerate applications & insights

- Ease firmware deployment at scale with **HPE OneView**
- Automate application performance tuning with **HPE Intelligent System Tuning**
- Get more insights from your data, faster with **Scalable Persistent Memory**

Security

Protect your business

- Adopt a holistic approach to protection from cradle to grave with **HPE Secure Compute Lifecycle**
- Protect your business from firmware attacks with ultimate firmware protection in **iLO 5 Silicon Root of Trust**: the first available silicon protected firmware

Economic Control

Pay only for what you use

- Achieve deployment flexibility and scale infrastructure on demand with **HPE Flex Capacity**
- Control manage and reduce utilization levels with **HPE Capacity Care Service** for mid-sized companies
- Future proof your investment with **HPEFS Gen9 to Gen10 trade up program**

Next Generation HPE Server Portfolio (as of 6/5/17)

Based on the Intel® Processor Scalable family

Shipping Summer 2017

HPE ProLiant BL460 Gen10 Blade
HPE ProLiant DL360 Gen10 Server
HPE ProLiant DL380 Gen10 Server
HPE ProLiant DL560 Gen10 Server
HPE Synergy 480 Gen10 Compute Module
HPE Synergy 660 Gen10 Compute Module

Shipping Fall 2017

HPE ProLiant ML110 Gen10 Server
HPE ProLiant ML350 Gen10 Server
HPE ProLiant DL120 Gen10 Server
HPE ProLiant DL160 Gen10 Server
HPE ProLiant DL180 Gen10 Server
HPE ProLiant DL580 Gen10 Server

¹ Based on external firm conducting cyber security penetration testing of a range of server products from a range of manufacturers, May 2017.
