

KNEEZUP Leg Wedge

Elevates Knees to Help Relieve Strain on Joints and Back Muscles

BENEFITS

- Helps reduce pressure on the lower back by allowing the lumbar curve to flatten out.
- Ideal for people with varicose veins and phlebitis.
- Elevates knees to a 30 degree angle so joints and muscles can relax, rest and rejuvenate.
- Helps increase blood flow to the lower extremities.
- Foam is covered with a soft velour cover that can be removed for washing.

Soothe sore and achy knees, relax tired legs and help reduce back strain

Medical experts agree that sleeping with your knees elevated will help improve circulation to your lower extremities! This easy to use wedge is also great for recovery from knee surgery. Simply position the cushion below knees and relax!

Use as a simple support cushion alone or purchase and use with either our Mattress Genie bed lift, or one of our back wedge cushions, for a support system that compares to an adjustable bed.

- Design elevates and supports knees
- Laying flat can put strain on the back
- Using KneezUp relieves tense back muscles with knee elevation
- Helps align spine
