KABOOTI[®] ICE

The KABOOTI ICE distributes your body's weight evenly - without high concentrations of pressure on sensitive areas - especially in the central and tailbone/coccyx area.

Makes the Ordinary Donut Obsolete!

Pressure mapping* shows soothing comfort with the Kabooti[®] Ice, but the donut cushion shows extremely high pressure concentration (red and orange areas) on buttocks. This can result in uncomfortable seating, reduced skin and surface blood circulation and potential damage to skin.

*Pressure maps performed with 175 lb. male, using XSensor pressure mapping equipment & software.
