Your new evergreen Windows 10 environment requires a modern approach to management and innovation. Make sure you make the most of Windows 10.

Windows 10 represents the shift to Windows-as-a-Service. There are no more 3- 4 yearly desktop upgrade projects. Windows 10 will be updated with the latest innovations twice a year. The **Evolve services** help you keep on top of this or can remove the overhead from you completely.

## Customer challenges

Using our services, we can help address the following key questions:

- How do you update processes to cater for Windows-as-a-Service? How do you manage and service Windows 10?
- What are the servicing channels?
- What tools can you use to manage Windows-as-a-Service updates? How do you identify, train on, and release the latest innovations?
- How do you reduce the overhead of managing Windows 10?

## Key features

Windows 10 needs ongoing management to ensure that your business gets the most out of it. You might have performed a rapid or tactical deployment and now need to strategically capitalise on the latest features. Or you may be wondering how you keep on top of the new servicing and release models.

The Windows 10 Evolve engagement can be tailored to suit your requirements across the following areas:

- Regular strategic advisory sessions to update you on what's coming
- Technology roadmap production and management
- Ensuring a Secure-by-Design approach
- Implementation of features that didn't make it into the initial rollout
- Windows 10 management as a service
- Ongoing end-user training and adoption support

## Enablement framework

| Envision and plan | Assess and Design | Build & Pilot | Prepare for Production |
|---|---|---|---|
|  |  |  |  |
| Identify objectives to plan pilot | Design core infrastructure and labs | Build and test initial configurations | Technology best practices and recommended deployment approaches. |
