

A CANCOM COMPANY

Windows 10

Start your Windows 10 journey

FastStart > Light > Full > Evolve

Data sheet

Key benefits

- ▶ Assess your existing IT Infrastructure capabilities
- ▶ Receive services tailored to suit your business
- ▶ Avoid the pitfalls of migration by working with Windows 10 experts
- ▶ Define a forward-thinking approach when modernising your EUC environment

Deliverables can include:

- ▶ Regular strategic advisory sessions
- ▶ Implementation and project planning
- ▶ Ongoing end-user training and support
- ▶ Windows 10 management as a service

"Cut your deployment time by 50%"

Accelerate your Windows 10 rollout plans and ensure low risk with high speed deployments.

Is your Windows 10 project already underway but you now need a rapid deployment? The **Windows 10 Light Service** is designed to build upon progress already made to minimise the dependences for deployment. You will benefit from our experience to sanity check plans and provide guidance and resources. So you can achieve your desired outcomes quickly and effectively.

Customer challenges

Using the **Light** service, we can help address the following key questions:

- What is the most effective way to deploy Windows 10?
- Are you doing the right things in the right order?
- Where do you re-use current investments and where to make new investments?
- How do you know your applications will work with Windows 10?
- How to meet 2020 deployment deadlines, where relevant, and the end of Windows 7 extended support?
- How to get most value out of Windows 10?
- How to engage and train your business?
- Where to find the right skills or enough time?

Key Features

Our experts will bring our knowledge gained from numerous deployments to accelerate your project. We can work with your teams providing as much, or as little, help as required to deliver everything from planning, to deployment and support services.

The **Windows 10 Light** engagement can be tailored to suit your requirements across the following areas:

Design and Planning Services

- Review of existing designs and plans
- Production of revised designs and plans

Health check/build of deployment dependencies

- Deployment and management systems
- Identify solutions
- Security and Policy Configuration
- Best practice image creation
