2019 Strategy Consulting Compensation Study

January 25, 2019

Thank you

- ◆ Charles Aris is proud to present its ninth annual Strategy Consulting Compensation Study, and a huge thank you is in order. Historically, we were able to gather the data required for this study simply by asking consultants about their current compensation over the course of thousands of career conversations we have each year. However ...
- ◆ Given recent [pay equity legislation](#) in portions of the United States and associated territories, we drastically changed our approach to gathering compensation data in 2018. Though pay equity laws currently only exist in a handful of states, we fully embraced the concept across all searches, regardless of location. Now, instead of asking candidates about their current compensation, we only ask about their compensation expectations.
- ◆ And that's where our gratitude comes in. For us to continue producing this study, the data had to come to us voluntarily and anonymously; so we launched our first-ever compensation survey. We send heartfelt thanks to the 1,489 of you who took the time to complete the survey that made this study possible. We're grateful to have such strong support from the strategy community.

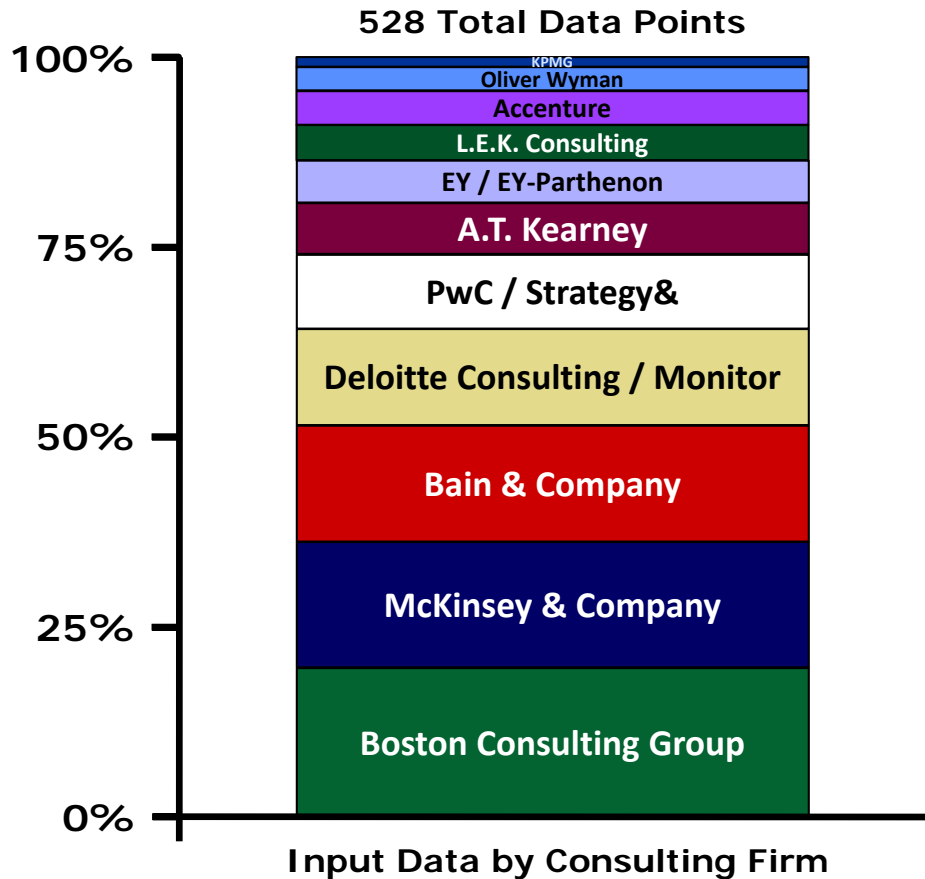

Key Facts on the Compensation Data Used for this Study

- ◆ All compensation data points for this study were collected via a voluntary and anonymous survey between August 31 and December 31, 2018. The survey tool, SoGoSurvey, restricts Charles Aris from seeing any identifying markers about anyone who completes the survey. It is also important to note that this voluntary and anonymous survey methodology ensures that all compensation data points gathered in this report abide strictly by the pay equity laws of each state, territory and municipality associated with the United States.
- ◆ 1,489 individuals – 689 of whom are current consultants – completed our survey. Of the remaining 800 respondents, 753 are former consultants, and 47 have never worked in consulting. For the purposes of this study, only data from current consultants was used. **Note that on March 29, 2019 we will publish a second compensation study that focuses solely on former consultants.**
- ◆ We eliminated 161 of the 689 responses from current consultants, leaving us with 528 total responses for this report. Responses were eliminated for a myriad of reasons, the most common of which was an incomplete or vague response.
- ◆ Compensation data points are voluntarily and anonymously self-reported by respondents and are not verified through any other means. That being said, we are extremely confident that the data points are accurate, given the consistency in responses we received across consultants and firms.

Input Data by Consulting Firm

- ◆ Our 2019 Strategy Consulting Compensation Study is driven by **528** survey responses from consultants across 11 consulting firms.
- ◆ 52.1% of the responses come from consultants at “The Big Three” firms: Boston Consulting Group; McKinsey & Company; and Bain & Company.
- ◆ Of the 528 total responses, 447 come from post-MBA consultants and 81 come from pre-MBA / undergraduate consultants.

Average Compensation* by Graduation Year

*Base salary plus target annual bonus only. Does not include retirement contribution, profit sharing, sign-on, car allowance or other such cash equivalents.

**Standard Deviation and Median numbers are calculated for base salary plus target annual bonus, i.e. the number at the top of each column.

^% Change1Yr equals the percentage change in total annual compensation (base salary plus target annual bonus only), from 2017 to 2018, for that graduation year.

^^% Change2Yr equals the percentage change in total annual compensation (base salary plus target annual bonus only), from 2016 to 2018, for that graduation year.

^^^% Change3Yr equals the percentage change in total annual compensation (base salary plus target annual bonus only), from 2015 to 2018, for that graduation year.

^^^^% Change4Yr equals the percentage change in total annual compensation (base salary plus target annual bonus only), from 2014 to 2018, for that graduation year.

^^^^^% Change5Yr equals the percentage change in total annual compensation (base salary plus target annual bonus only), from 2013 to 2018, for that graduation year.

Average Increase in Annual Compensation

Post-MBA

How much did the average post-MBA consultant's compensation increase in 2018 compared to previous years?

- ◆ Post-MBA strategy consultants experienced a 17.0% average increase in compensation from 2017 to 2018, a number that is on the higher end of previous averages.
- ◆ **What's driving it?** Continued demand for consulting services furthered the supply-demand imbalance, prompting several leading firms to issue midyear raises in 2018 on top of standard raises at year end (essentially making 2018 a "double raise" year for those firms).

- ◆ ***NOTE:** Historically, Charles Aris has not included "Direct Promote" compensation in the Pre-MBA data set. However, given the growing propensity for top consulting firms to promote undergraduates to post-MBA positions in recent years, we decided to include Direct Promote compensation changes in this year's report – hence a significant increase of 41.0%.
- ◆ After reviewing the survey responses, we considered 19 of the 81 Pre-MBA responses (23%) to be from Direct Promote consultants.
- ◆ If we were to eliminate the 19 Direct Promote responses (as in years past), Pre-MBA consultants would have experienced an average increase of 22.8% – much more in line with previous years.

Pre-MBA

How much did the average Pre-MBA / Undergraduate consultant's compensation increase in 2018 compared to previous years?

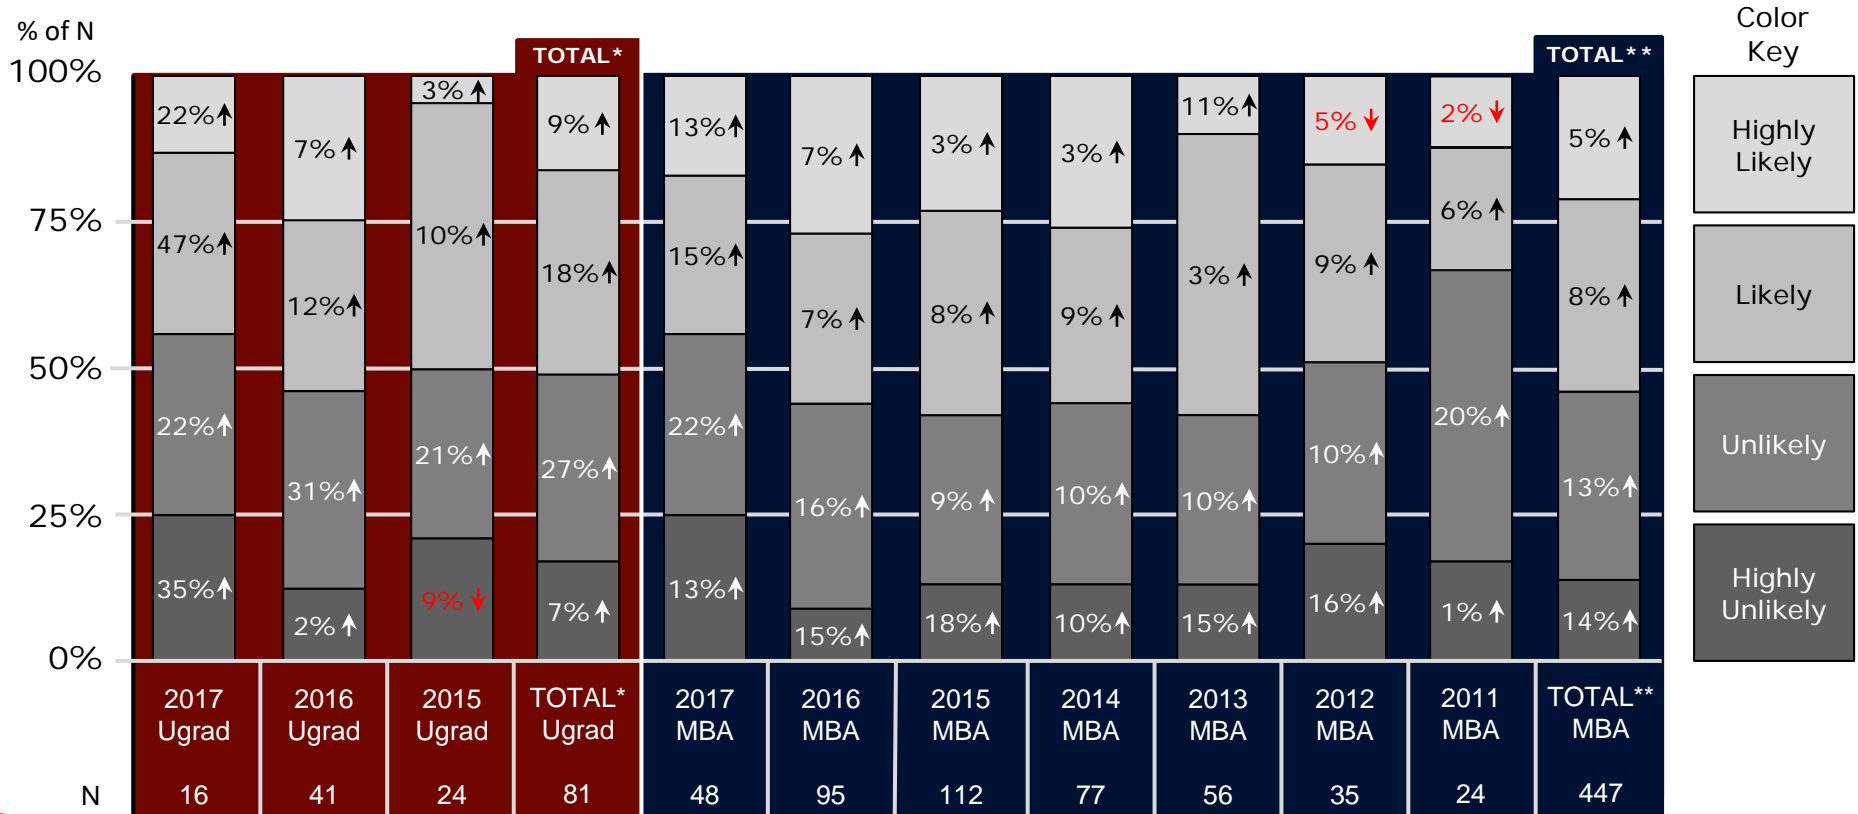

Likelihood to Leave Consulting vs. Base Salary Expectations

This chart summarizes two key data points:

- 1) The likelihood of respondents to leave consulting in the next six months, by consulting class (the color of the bars)
- 2) The average percentage change in base salary expected by each respondent group (which is the percentage listed in each bar segment).

*Weighted average of 2015-2017 undergrad data
 **Weighted average of 2011-2017 MBA data
