- Increased landing page conversions by 9%
- 175% over military spouse enrollment goal

NCAA DIVISION 1 UNIVERSITY - THE RECRUITING CHALLENGE

Understanding the challenges military spouses face in managing their career and education within the military lifestyle, a well-recognized Division 1 University desired to extend its program offering to the military spouse community by designing new flexibility and unique structures into their program that would highly benefit the transient realities of military life. Recognizing their lack of experience recruiting and targeting the military spouse demographic, the school sought experts at targeting and building campaigns focused on niches within the military community.
The NCAA Division 1 University had previously worked with branding components of VIQTORY’s extensive publication audience, and were intrigued by extending their partnership to include the design and execution of an end-to-end Managed Programmatic Advertising campaign to target the Military Spouse audience. Given the short time-frame for program enrollment and recognizing VIQTORY’s decades of experience in military audience engagement, the University was rapidly able to authorize VIQTORY to develop the digital assets, messaging, and creative materials to be used throughout the Managed Programmatic Ad campaign. A specific goal for the campaign identified was developing greater internal understanding of the core marketing KPI’s such as current ad effectiveness, CTR, conversion rates, and how to build a proper lead generation funnel with a measurable ROI. VIQTORY’s expert and knowledgeable team provided ongoing high-touch support and education to improve the University’s internal capacities, which lead to gains in overall marketing effectiveness.

VIQTORY’S UNIQUE EXPERTISE

Founded in 2001 by Navy veterans, VIQTORY established itself as the go-to resource for military transitioning to civilian education and employment. Since then, VIQTORY has built itself into a trusted leader in military spouse and veteran education recruitment, with unprecedented data-based insight into veteran and military spouse interests, skills and education-seeking behaviors. VIQTORY’s rich data set, incorporates survey results, publicly available data, and predictive models built by their in-house data scientists. Strong data insights combined to great effect with managed programmatic advertising layered over a 15 year publishing record with brand safe assets, helps clients reach millions of U.S. veterans and military spouses.

THE RESULTS

TURNING DATA INTO RESULTS FOR COLLEGES AND UNIVERSITIES REACHING THE MILITARY COMMUNITY

First-party data enables VIQTORY to focus with great precision on the audiences that matter most to their clients. But limitations of data-matching technology can create a gap between desired reach and available online targets. VIQTORY works closely with partners to develop a strong message-to-market match with custom designed digital assets like banners, landing pages and unique content. While many clients often bring their own creative, VIQTORY’s internal creative team has 40 combined years of military- and veteran-specific design experience, which is critical to a successful campaign that hinges on delivering the right message at the right time to the right audience segment. To ensure campaigns stay up to date, VIQTORY constantly swaps out creatives and makes changes on the go.
