## Features to superpower your online directory

---

### Real Time Booking

Start providing a more complete directory by letting your users book services directly from your platform: the business will be notified of the booking immediately and see it in their calendar. So easy.

### External Calendar Synchronization

Appointedd has a two-way calendar synchronization with major external calendar systems, including Google and iCloud, meaning the businesses you host can see their bookings in their own calendar.

### Online Payments

It's so quick and easy to start taking payments or deposits along with bookings, so that your directory can become a one-stop shop for the entire process. And all payments are totally secure, for everyone's peace of mind.

### Customizable Interface

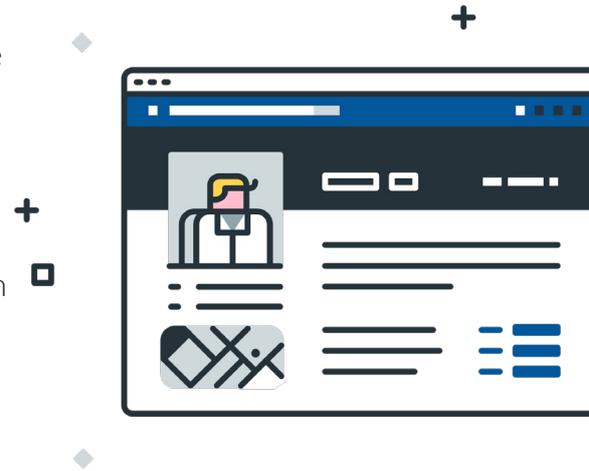

Appointedd's booking apps are mobile optimized and can be easily customized to suit the flow the business needs. Plus they can fit to your website branding and everything takes place on the same page, so there's no distracting redirection.

### Multi-Timezone Booking

No matter where your users or hosted businesses are in the world, their availability or choice of time slot appears in their own time zone, so there's no timezone math for anyone.

### Tried and Tested System

Thousands of bookings have been made through Appointedd since its creation and the number of satisfied customers grows every single day. You'll be in safe hands with us.

**Markus Brinsa**
