SCHOLARCHIP
SCHOOL SAFETY SOLUTIONS

WELCOME TO SCHOLARCHIP

Dear School Administrator,

We listened to your concerns about safety and accountability. Based on our understanding of the average size school, ScholarChip recommends the implementation of a holistic, scalable solution that will manage student, staff and visitor identity, control building and facility access and provide mental health support to achieve a safe school climate. The following pages provide detail on each of the components included in the recommended solution.

• Building access concern comment here.
• Concerns about dealing with disruptive students.
• Managing student identity and printing smart ID internally.

ScholarChip's school safety and student accountability system gives you the freedom to focus on your most important tasks—like gaining valuable insights into your student population, making data driven decisions affecting student safety and academic success, letting students learn in a safe environment, providing teachers with more class time and delivering peace of mind to parents.
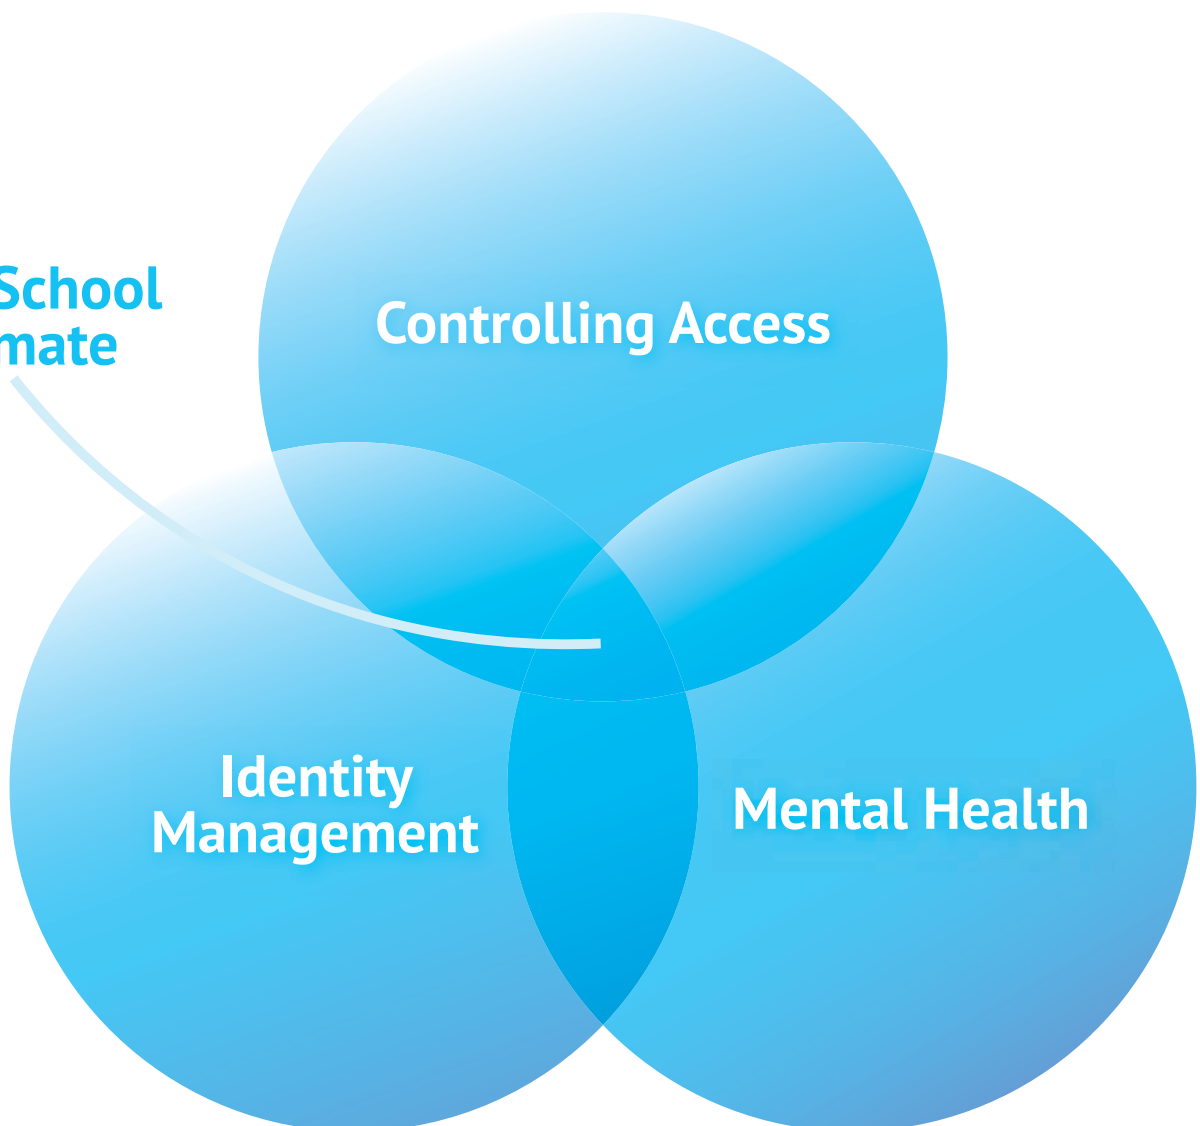

Best regards,

Kevin Barney
Senior Vice President
of Business Development

OUR HOLISTIC
APPROACH

"Rather than viewing school safety as a targeted outcome of a designated stand-alone program or piece of equipment, a comprehensive model seeks to integrate all services for students and families by framing behavioral, mental health, and social services within the context of school culture and learning." *

- ☑ ScholarChip Issuance
  (Cloud Smart ID)
- ☑ Visitor Management
- ☑ Large Group Entry
- ☑ ABE
  (Alternative Behavior Educator)

Safe School Climate

Controlling Access

Identity Management

WE ALL NEED
SAFER SCHOOLS

1. ScholarChip Issuance - Cloud Smart ID
Print and photograph student and staff smart ID cards right in school.

2. Visitor Manager - Safety Station
Identify all visitors and run a sex offender check. Visitors will have data records that include destination and time stamp of arrival and departure.
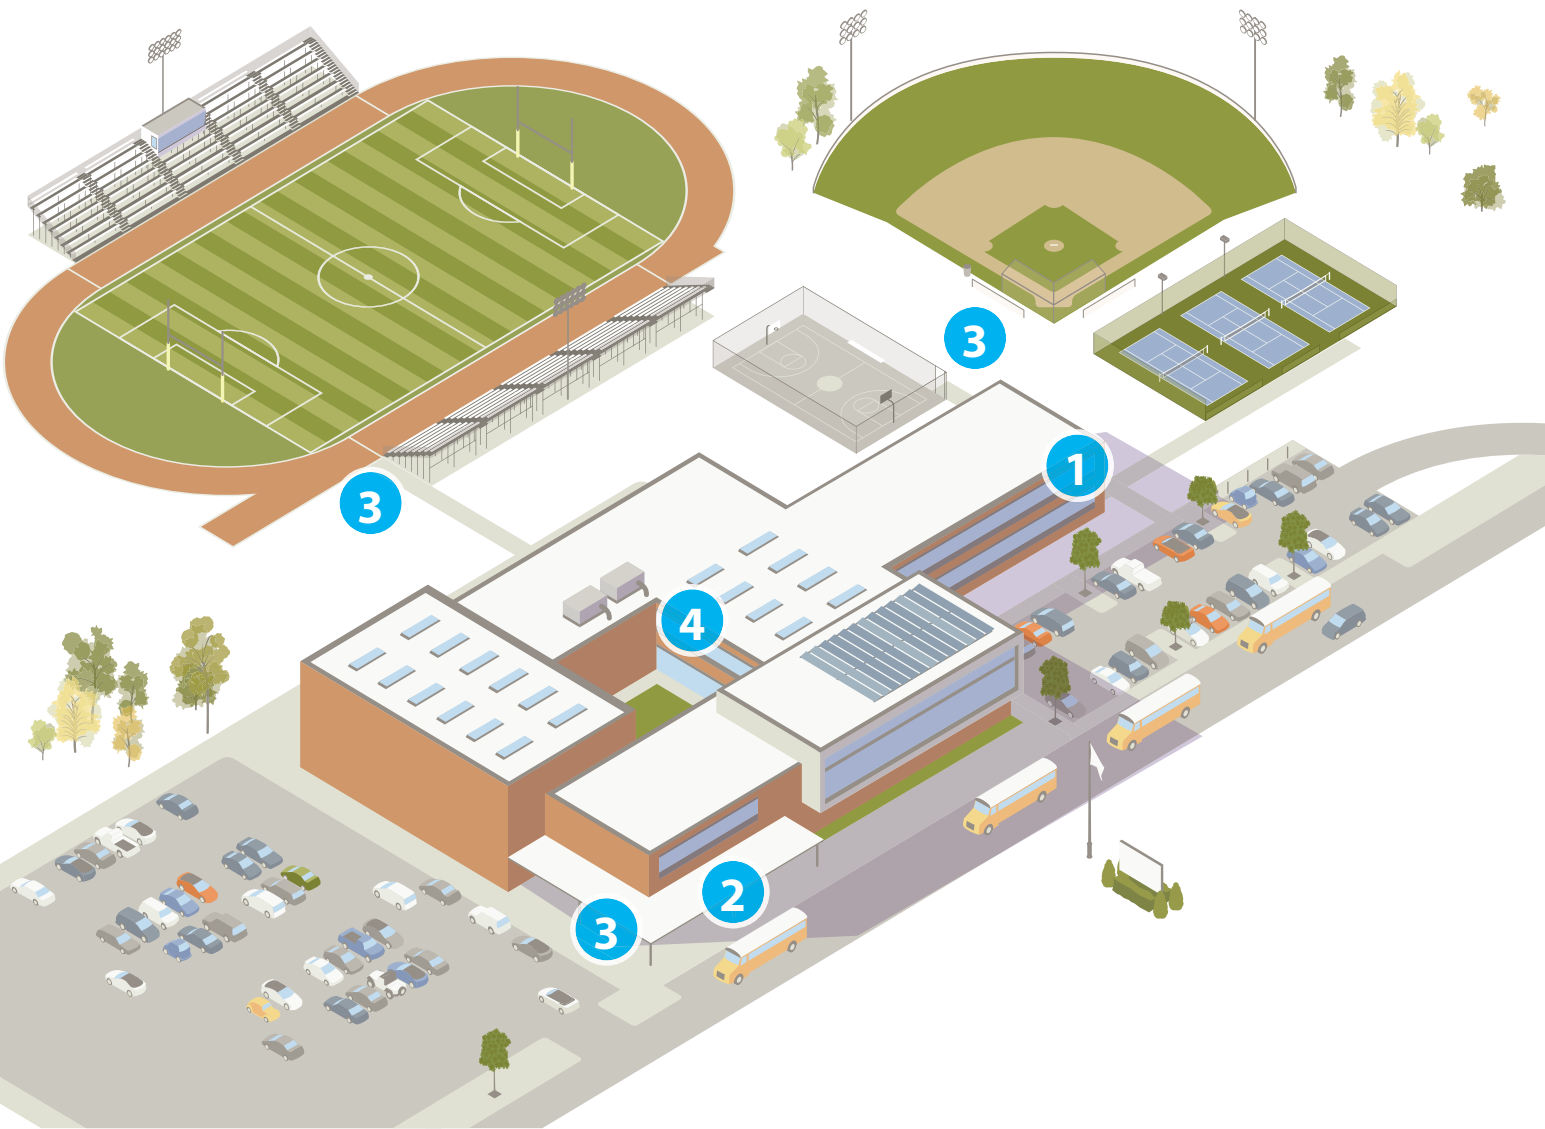

3. Large Group Entry- Safety Station
Take student attendance at the school entrance. Only enrolled students have access into the school. Stations can be moved and used for special events.

4. Alternative Behavior Educator (ABE)
Proactively address student mental health and behavior issues. Provides effective interventions, tracks and evaluates student progress throughout their school career.

SCHOLARCHIP ISSUANCE
CLOUD SMART ID

① Cloud Smart ID - Issuing Smart ID Cards

ScholarChip streamlines student smart ID card issuance with our affordable Cloud Smart ID application. Cloud Smart ID is a browser-based student and staff card issuance system. Schools can save money by using their own hardware to connect to the most advanced ID card system available in the market today.

ScholarChip's web-based ID card system is integrated with popular Student Information Systems (SIS) like PowerSchool® and others. When combined with a card reader, school districts can enjoy automated attendance-based operations and security services. Administrators can analyze data using ScholarChip's powerful, actionable reports, and make data-driven decisions that are quantifiable and justifiable. Hands down, we provide the easiest, fastest and most secure way to issue smart ID cards.

FEATURES & BENEFITS:

Printer with printer ribbon

Camera & USB hub

Card issuance data, integrated with Student Information Systems, is ultra secure

Administrators can view valuable student and staff data through your ScholarChip Management Portal.

SAFETY STATIONS

② Visitor Manager

Administrators have access to visitor data and can manage a visitor's status from the web 24/7. Our visitor stations rapidly process visitors, capture staff-time and attendance, and issue key-chain style fobs to frequently visiting parents. ScholarChip Visitor Manager integrates with Student Information Systems to manage student pick-up and custodial issues. We know that no two schools operate alike; for flexibility, our visitor service is available in several software and hardware formats.

③ Large Group Entry

As they enter the building, students tap their smart ID-cards onto our wheeled kiosks. Our Large Group Attendance Service captures previously uncollected data, gathering real time attendance data for any location outside of a classroom.

FEATURES & BENEFITS:

Visitor Manager

Secures adult visitor entry to the schools

Automated visitor data collection

Sex offender search and school defined alerts

Prints visitor passes

Large Group Entry

Integrates with all modern student information systems

Alerts for suspended students

Real time and historical reporting and graphic dashboards

Administrators can view valuable student and staff data through your ScholarChip Management

ALTERNATIVE BEHAVIOR EDUCATOR - ABE

④ ScholarChip ABE - Behavior Management

Designed with student success in mind, ScholarChip ABE focuses on the importance of student behavior and social success. We believe good behavior is within reach for all students.

Our Behavior Management software empowers teachers to work through student performance patterns. Educators have at their fingertips, one of the most comprehensive methods to combat class disruptions. It starts with a reported misbehavior by a student; next, a corrective course of action is determined for the teacher to take; and finally, the student is positively reinforced through interactive software to deter repeat offenses.

FEATURES & BENEFITS:

Paperless Discipline Referral saves teachers time

Enrolls students in a behavior reward program

Over 700 evidence-based modules available

Intuitive user interface

Provides administrators with an online method of recording and acting on student behaviors

Administrators can view valuable student and staff data through your ScholarChip Management Portal.

SCHOLARCHIP

FOCUSED ON YOUR SCHOOL'S SUCCESS

Throughout America, our large and small districts have found the freedom to achieve and succeed.

"**Attendance** for our high school students **has gone up more than four percentage points** over the past three years and ScholarChip's system is one of the reasons for this increase. The technology is unbelievable."

- School District of Philadelphia

"...their visitor manager seamlessly processes thousands of visitors a day. **The system flawlessly sends alerts to key administrators** reporting potential sex offender name matches."

- Fairfax County Public Schools

"Because it's an electronic process, I can tell who is in the building in real time, which is **vital information from a security standpoint."**

- Bay Shore, NY High School
