The Advanced Torque Difference

Accuracy ±1% and ±0.4% with Digital Angle Measurement

Repeatability Our accuracy is **100% repeatable**

Ergonomics ATP tools are much **smaller and lighter** than anything else on the market

Measurement We can **validate** torque by capturing break-away values

Reduced Man Hours With **improved accuracy** and **repeatability**, you can ensure that your torque procedure is executed correctly the first time

Price and Lead Time Our pricing and lead time are **consistently lower** than those of our competitors

Reduced Down Time **10 minute** calibration time

Digital Torque is calculated purely in the **digital** realm

Data Storage Torque values can be **exported** to a printer or computer system
