

IS YOUR BUSINESS OUTGROWING YOUR ACCOUNTING SOFTWARE?

Tell-tale signs your business is ready for a more comprehensive business management solution

- 

Systems are disconnected and information is siloed
- 

Reporting is complicated and provides insufficient information
- 

Manual processes result in duplicate entry and errors
- 

Accounting occurs in Excel, not your financial system
- 

Lack of workflows and audit trails puts your business at risk

From day one, Microsoft Dynamics 365 Business Central makes managing financials, sales, service and operations easier and faster.

Connect your business

Make smarter decisions

Start and grow easily

Connect your people and processes like never before

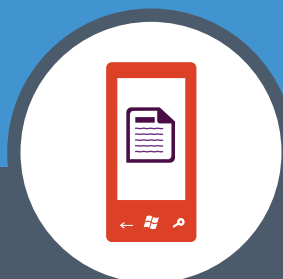

Go from quote to cash without leaving your inbox. Easily export data to Excel and create outgoing documents directly in Word

Get a complete picture of your business and make informed decision with powerful reporting and custom dashboards

Work from a desktop, laptop, tablet, or phone with one experience that is consistent and secure

Automate and secure business processes with easy-to-create workflows and audit trails

Be ready for growth with a scalable solution in the cloud so it's easy to set up, manage and extend.
