

TiDB.wasm

Run TiDB Inside Your Browser (and everywhere)

<http://tnthub.com/tidb/index.html>

Part I – Introduction

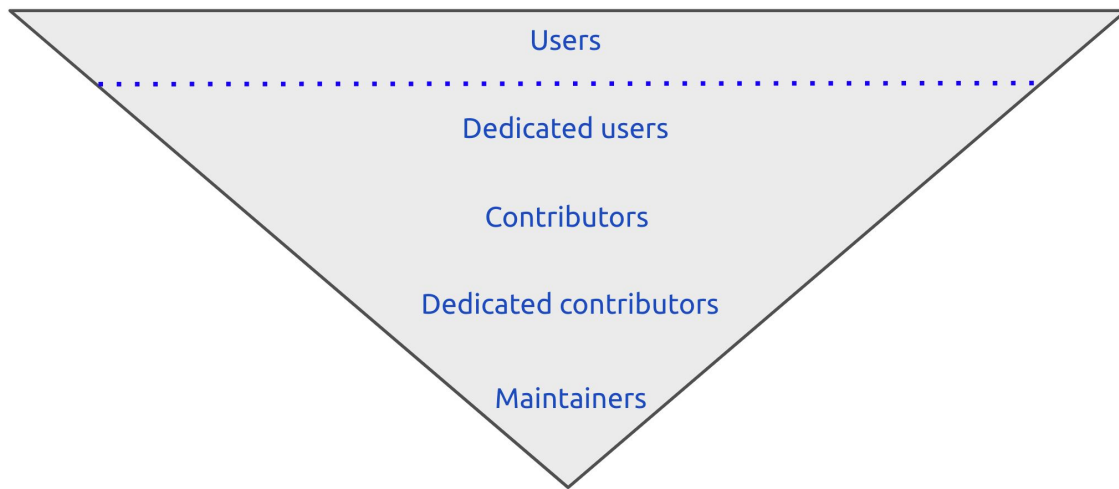

Pain Point

- Most of customers require compatibility testing in first step
 - we can make the progress more fluent
 - avoid any downloading, compilation and deployment

Pain Point

- Real-time sandbox, let more users experience TiDB more easily
 - conveniently, instantly, interactively
 - improve our community influence
 - and we won't waste our resource

Features

- Import data & metadata
 - Import “.sql” files
 - Import CSV (load data into table xxx)
 - Import statistics
- Persistent storage
 - IndexedDB: a low-level API for client-side storage of significant amounts of structured data, including files/blobs

Part II – Demo

Thank You !
