

## ***Super Truck Vacuum Collection Systems***

### ***Maximum Performance Maximum Marketing Image***

Vac Systems International is proud to offer it's Super Truck Vacuum Collection Systems. Super Truck is designed for the air duct cleaning contractor who wants maximum marketing image and maximum performance (suction).

Nothing provides the visual impact of a Super Truck on the job or as a traveling billboard as it goes from job to job. Super Trucks superior performance means maximum productivity and profits! The 12,500 cfm at 16" static pressure with filter bags in place performance has been certified by an independent testing agency. Free air performance without filter bags is 16,000 cfm at 21" of static pressure.

Design the Super Truck you want! First, select the truck you want (Chevy, Ford, Hino, Isuzu, International & Kenworth). Second, add one of the four basic vacuum assemblies that will be mounted on the truck. Third, customize your Super Truck from the many available options.

## ***Features & Options***

---

Super Truck gives you more of what you want in a truck mounted vacuum collection system. More performance for better productivity. More choices so you get the Super Truck you want. Excellent advertising to attract attention and customers! A better truck system for the dollar to give you the best value!
