

OSP Insight Edit 8.0 – Hotfix Release Notes 1/4/2018

Fixes

1. Wave View will now accept decimals as part of the Wave Length
2. Route Schematic would sometimes throw an error when the Route had a large amount of splitters. This is fixed.
3. The Impact Report will no longer throw an error if it involves a Saved Route with an apostrophe in its name.
4. Modified how we delete Equipment to account for a rare bug when deleting Equipment created in version 7.
