

Experienced Power BI / Data Architect

Compass IT Compliance, LLC is a leading Information Technology Security, Audit and Compliance firm. Companies large and small must comply with a confusing mix of regulations and laws such as the PCI DSS (Payment Card Industry Data Security Standard), FFIEC, Sarbanes-Oxley, HIPAA / HITECH, Basel II, Gramm-Leach-Bliley Act, Patriot Act, Identity Theft Red Flags, SEC requirements and state privacy laws. Even in today's tough economy, and in the face of rising costs and shrinking staffs, companies must remain a step ahead of these complex compliance requirements.

Compass IT Compliance is looking for a **Power BI/Data Architect** with experience in client-focused projects emphasizing data modeling, enterprise processes, and master data management using Microsoft's Power BI platform. The ideal candidate will have experience with programming, data ingestion, transformation, and analytics technologies and will be informed on trends in data architecture. The **Power BI Data/Architect** will need an emphasis and in-depth understanding of diverse data sets, near-real-time content services, and informative visualizations. The **Power BI/Data Architect** will be responsible for supporting design and development of data software systems, as well as project management, testing, and support activities within a small team environment.

Essential Duties and Responsibilities

- Develop enterprise data structures & functional programming relating to buildings, sensors, and various information systems
- Build organized, scalable, & useful analytics for diverse customer needs
- Deliver creative solutions that fit existing systems, budgets, and policies

Minimum Qualifications (Knowledge, Skills, and Abilities)

- Expert data engineer (REST APIs, JSON, etc.)
- Good at creating practical data models & streamlining data processes
- Great at translating customer requests into successful deliverables
- Efficient developer in Python, SQL, JavaScript
- Develop user-facing reports (Power BI)
- Strong verbal and written communication skills
- Appetite for learning, evaluating, and testing new technologies
- Experience with source control systems and issue tracking (git, etc)
- 5+ years of relevant experience
- Bachelor's Degree (Science or Engineering preferred)

Additional Skills:

- Familiarity with PCI, SOC, HIPPA, IT Audit, Security and Compliance a plus
